Thread: [Would you purchase an eBook on how to use Craigslist and not get your ads blocked?](#)

Muggle - September 8, 2017, 10:19 pm

Was curious if anyone would actually buy an eBook if I made one on how to use craigslist for eWhoring and not get blocked/banned/your ads ghosted. I make all of my eWhoring money from craigslist and over the years have pretty much developed down to a perfect science of how to post ads and have them appear every time and not get removed instantly. It wouldn't be expensive, it would be around \$10 or \$15. It's not really an eWhoring ebook telling my exact method. It would just be an ebook telling you how to get your ads posted and not flagged.

Just wanted to see if there would be any interest in this for people before I go and make one.

I wasn't asking if you wanted a vouch copy lol. I'm asking if it is something you would purchase if you saw someone selling it. Of course you'd take a vouch copy. People would take a vouch copy of a blank guide.

Don't limit your question to just e whores. If there are ways to avoid the blocks then I'm sure many will buy it, not just e whores.

I didn't think many people on here used craigslist for other things where they would need to post a lot of ads.

Just got this guide as a review and it's nothing special, there's one small thing that might be beneficial for not getting flagged right away but this method is on YouTube and other sources, and I think it's already patched anyways.

Hey everyone who is reading this guys "review" - This doofus said "I don't want this guide, I want you to give me VPN's that work so I don't get flagged, this is stupid" - This dummy doesn't want a guide on how to not get flagged, he just wanted to see if I gave free VPN's out.
