Vouch for this guy! I've bought a VPS from him (great specs, superb price) and its been working amazingly. He not only sold me the VPS, he helped me migrate my data from the old server to the new one so my websites werent effected!

I am broke at the moment, otherwise I would have bought it seriously (umm, can someone donate me this? i'll give up the older VPS I bought)

Vouch for this guy. Man he is AWESOME! I had the option of continuing my old service or buying his (price was almost same), so I bought his. He did all the transferring of my old VPS to the new VPS, even installed somethings that I wanted that weren't there. A website developed some problem and he took out time for me and fixed it!!
