Thread: [Watches, digital or analog?](#)

Was wondering, which type of watches do you wear/prefer, one with digital display? or analog display?

Personally I prefer analog, but using a digital one because it's from my grand father.

I have a few of both, depends what I'm doing. If I'm trying to wear it as an accessory its analog, if I'm at work its usually digital since my digital watches are used for more than telling time.

Digital, easier to tell the time and less for looks.

Digital. Its a lot more than just a watch with it

I barely use any apps on my Apple Watch

Ofc analog. Watches are more than just devices to tell time. They are a fashion accessory.

But like a member said above, depends what on you're doing.
