Thread: [Permanently disable Windows Defender?](#)

juulstar - September 9, 2017, 5:12 pm

Sorry to be a bother, but Windows Defender keeps on turning it self on, and is there any way to stop it from turning on over and over?

Deany - September 9, 2017, 5:13 pm

try turning it off through services.msc

juulstar - September 9, 2017, 5:17 pm

It didn't like when I tried to do that, I'll have to find some type of exploit, thank you though. ?

It won't stop running until you install another antivirus I tried it but haven't found a solution so just try to install Avira or something!

Sality.su - September 10, 2017, 12:13 am

Disable it via your Group Policy editor.

Computer configuration > Administrative templates > Windows components > Windows Defender.

Double click "Turn off Windows defender" and then "Enable".

Repeat the process and click disable if you want to re-enable defender

I don't have a high enough version of Windows to do that.

berkay692009 - September 10, 2017, 2:52 pm

Open regedit using Windows Key + R (Run)

Change EnableFirewall to 0 in

HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Services\SharedAccess\Parameters\FirewallPolicy\StandardProfile

Sometimes it happens to be in

HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\WindowsFirewall\

or

HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\WindowsFirewall\DomainProfiles

(Sep 10, 2017 03:44 PM)M0HX Wrote: [\[CITE\]](#) Here ya go lazyfuck.. just open notepad and save below codes as .reg

Disable Windows Defender in Windows 10.reg

Code Windows Registry Editor Version 5.00

[HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows Defender]

"DisableAntiSpyware"=dword:00000001

[HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows Defender\Real-Time Protection]

"DisableBehaviorMonitoring"=dword:00000001

"DisableOnAccessProtection"=dword:00000001

"DisableScanOnRealtimeEnable"=dword:00000001

Restore Windows Defender in Windows 10.reg

Code Windows Registry Editor Version 5.00

[-HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows Defender]

then simply after you save just double-click the file.

thank youuu

yayimamember - September 12, 2017, 4:53 am

If none of these work try power button

ozcankaya - September 12, 2017, 8:25 am

Open regedit.exe

cd HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows Defender

Create new DWORD 32BIT name = DisableAntiSpyware - value = 1

Restart you PC
