Thread: [Signature ETH to the Moon](#)

?thereum - September 10, 2017, 3:39 am

What do yall think ? ?

Made another one : Spoiler ([Click to View](#)) which one is better?

look down ?

Gifter666 - September 10, 2017, 3:41 am

Love this, will make this my signature when i can.

Zens - September 10, 2017, 4:38 am

ETH to the moon~~~

looked cool.

Lukas - September 10, 2017, 5:22 am

You did a really good job at making it look less out of place.

<http://prntscr.com/gjdee3> - I don't like this, I thinking it should stay within the border of the image. Also, crop the image a bit and delete the space entry above your image so it fits.

Why have the top edges rounded and bottom not the same? Or vice versa.

Thanks for the feedback, i guess i just thought it looked cool.. when i have time i will take a second look at it again and finish it ?

Lanve - September 10, 2017, 7:10 am

Like mentioned above, the things topping out should be better removed. But either way, you did a good job.

Just made another one.. dont really like it that much tho.. what do you think?

Satur - September 10, 2017, 3:14 pm

Cool, but I'd prefer wearing the ETH logo with rainbows.

Yup!

Also OP, the new one does have a problem.

Why doesn't the camera man have a space suit on...

Normal cameras can work in space to an extent. NASA had to modify their cameras to make sure vacuums and the cold of space doesn't kill the camera's sensors or the battery.

Skull-13 - September 10, 2017, 8:28 pm

Hey thanks to bring us this. This is an awesome work and I'm waiting that the ETH goes to the moon, lol.

The one posted on this thread looks better without doubts in my opinion, i dont like the flag in your signature for some reason but nice work overall 8.5/10

Princeton - September 12, 2017, 4:56 am

I miss making sigs, reminds me of the old time.
Nice work.
