Thread: [Previous Youtube Video Removed after Uploading a New Video..](#)

xbryan - September 10, 2017, 10:25 am

hey guys, this happened 3 times already, at first i thought the problem was something else.. so the thing is, when i upload a video and boost it, it's fine.. but when i upload a new video and boost the new video, the previous one or the first video that i uploaded is getting removed because of copyright strike..

this happened 3 times already, it always happens when i'm trying to upload a second video and boost it. i want to scale up my earnings, in order to do that, i need to upload more videos. but i am limited to only 1 video for some reason..

i need your help guys, i already tried alot of stuff myself to try and fix it, but i still can't figure out how..

if you are uploading the exactly the same video spin it add some stuff change for each video, other then "Copyright" make sure you're not using some music that's disallowed or you're not using

content which belongs to someone else.

Bobthegod - *September 11, 2017, 12:42 pm*

you have to test everything yourself

it doesn't work out the same way for everyone

instead of asking on forums where no one might give the "right" answer for you ,go see urself where u fucked

I also witnessed this happening when uploading the same video just slightly changed. To stop this happening I just started editing the video a bit more heavily so that they are not so similar.
