Thread: ["Lost Love" mix hit 4K views on YouTube!](#)

Noceur - September 10, 2017, 3:58 pm

I made this mix almost a year ago when my ex and I were going through some shit and we basically took some time away from each other. Life felt so empty but things smoothed out as the months progressed but I ended it earlier this year, the day after Valentines. She wasn't worth dealing with if someone can't try and help themselves. :)

However, it's one of my most popular mixes and I'm happy to see it hit 4K views. Never thought something of mine would get this far. ?

Here's the video for anyone that wants to listen:

thanks so much. i have been doing this for almost two years and decided to start using YouTube to upload them.

main reason they don't get much engagement is because I don't use the common niche of saying: "BEST EDM MIX 2017 HOT." or something like that.

i like adding a meaning behind them.

Hell yeah! Main reason I made Local Dreamer since it includes more LiL PEEP than anything! thanks so much. :)
