Thread: [HOW TO GROW MASSIVE ON INSTAGRAM \(Auto follow, Like, Comment & Schedule\)](#)

GramHQ - September 11, 2017, 11:09 am

[GramHQ](#) provides the ability to schedule instagram posts from your computer, auto follow and like posts/users in your niche using hashtags.

Users are obliged to follow you back in return for your kindness. This is how most instagram stat accounts are grown.

I'm currently gaining 150 followers per day, and averaging 500 likes per post (in 2 weeks)

RECOMMENDED: USE A PROXY WHEN ADDING EACH ACCOUNT TO PREVENT DELAYS

Looks like a good service for a competitive price. I'm trying to start growing IG accounts and the calendar planner and auto posting is super useful

Don't think the unfollow feature is working properly? Activated it and it only unfollowed one user in the past 2 hours.

What speed are you using, enable "very fast".

Enabled Very Fast from the start. So far it's only unfollowed 4 people.

We're adding custom intervals so that users can set the amount of people they follow/like/unfollow per hour. Atm it's set to 120 per day to prevent anyone's account being disabled.

Will we be able to like/follow based on what emojis or words people have in their bios(instead of hashtags)? Very interested in this. Thank you.

At the moment no, however I'll look into adding it! Thanks for the suggestion.

Can you send me a list of the best hashtags (or the hashtags you personally use) to maximise the amount of followers I can get?

I'll pay extra for it :)

funtela - September 14, 2017, 12:29 pm

I've heard that autoposting flags your account.

Yackoo - September 20, 2017, 12:38 pm

Im using the 7 days Test right now. Will give a feedback after it. And if it works good Ill buy it ofc! :)

Synfuls - September 21, 2017, 5:05 pm

Does this have auto DM's as in u can dm specific users in bulk ?

ACP - September 23, 2017, 3:28 am

Sent you a PM regarding this, super interested.

OnePlus6 - September 23, 2017, 3:46 am

Don't think this works as intended yet.. Auto unfollow still doesn't work and based on the activity, it's only auto liked one post with one of the 15 hashtags I set in the past 10 hours. It's basically almost idle..

reroute - September 24, 2017, 10:39 am

I just purchased this and after an hour of using I don't think it followed anyone and I believe auto like works a little. Can I get some assistance for this, also this is for my personal Instagram account what's some good #hashtags to use? Also does the unfollow bot unfollow my already followed people?

acc0unt - September 25, 2017, 1:37 am

Does this still fully work, PM me if so I'll purchase and review.

trevor4595 - October 1, 2017, 9:15 am

Interested, posting to come back.

Aspartame - *October 11, 2017, 5:19 am*

Waiting to see more reviews that show it is working correctly and not idling

James_Zehmel - *October 12, 2017, 7:44 am*

So I can do everything like posting commenting etc. on desktop? including the other features?
