Thread: [Cheapass Hearthstone Packs](#)

eBookReviewer - September 12, 2017, 4:46 am

Hey there,

In this method I will show you how to get cheap hearthstone packs.
Usually you will get around 75-105 packs for 20 Euros
Also includes 2 other methods, which will give you a couple of packs completely free.

This includes support via. skype or pm.

Terms of Service

- No Refunds
- No Resale/Leaking of this method (only for personal use)
- No Sales trashing
- No Chargebacks if you buy via paypal.

It works pretty flawlessly, except about 1 out of 5 times, you will have to wait a couple days for it to work.

Even if you dont play hearthstone yourself, you can use this technique to monetize, by reselling accounts with unopened packs. Theres lots of demand for this, since the game is ridiculously expensive.

Price: 40 Euro

is this repeatable? so for \$100 I could potentially get 800 packs?

It's simply insane that you're selling a thing that has been known forever for €40

Yes.

Sometimes you get more, sometimes less.
