Thread: [Skype resolvers ip hide](#)

Imfao3zWin - September 12, 2017, 10:09 am

Hello, is it possible to hide your ip from all skype resolvers ? Or this is not even possible ?
To hide your ip from database records etc ?

Tsukiri - September 12, 2017, 10:11 am

Skype resolvers don't even work anymore.
As long as you don't call with the person, nothing will happen.

Hiding IP from skype is impossible, it will always detect the connection you use. You can use a VPN or proxy though

alphamodz - September 12, 2017, 11:11 am

you can use Skype online for hide your ip

Had no clue about this. Sorry for trying to sound clever, in that case.

OG-SB - September 12, 2017, 4:23 pm

Yes we are selling skype blacklist for the most skype resolver ever used which is called -
<http://skyperesolver.net/>
Let me know once you pay we can blacklist ur username from that website.

khureshi - September 15, 2017, 1:37 am

True, resolvers dont work anymore, it has been patched by skype.

<http://resolver.c99.nl/>

Sigh not true. Some work.

sp??k? - September 16, 2017, 6:02 am

Naah some skype resolvers work again. It's true you can blacklist your ip from database records on the site but it costs money most times. Try using VPN instead to hide your ip. Or use the web version of skype. I highly doubt someone would use an exploit to bypass web version of skype and get your ip.

alt5xxxxxxxxxxxxxxxxxx - *September 17, 2017, 8:40 am*

to answer your question, yes

Hornbuckle - *September 17, 2017, 2:35 pm*

Use a VPN keep in mind some resolvers have your IP in a database.

Skypes dead just use discord.
