Not really a fanboy myself but I'm really liking these, what do you guys think?
Specs and Features of iPhone X since I couldn't screenshot the ones for 8 :P

@vincent - September 12, 2017, 11:54 am

Loved the iPhone X, probably going to get it. Looked amazing. :)

champagnpapi - September 12, 2017, 11:55 am

Yeah it was dope,now the true depth camera on front too,they shouldn't have removed the touch id but yeah whatever :/

'Ryan - September 12, 2017, 11:56 am

I feel like tim cook just shoved a macbook down my throat and started kicking me. I'll be preordering the X.

handecelebi - September 12, 2017, 12:03 pm

stupid as hell.. basically same phone with like 3 more features... and hype beast will buy it

Nadisty - September 12, 2017, 12:04 pm

Not too sure about FaceID, just seems something else the feds can use to track you, but i'd probably get it.

It absolutely is several lawsuits in the making considering all they have to do is point your phone at your face while you're handcuffed and they can look through your shit without a warrant, but apparently there is a feature in iOS that allows you to disable Face ID without actually going into the settings just by hitting the power button 5 times.

I'm on the developer beta (not the regular beta) and about a year ago they added an update where when you pressed the lock button 5 times it started blaring a loud horn then started a 5 second countdown till it would send your location to the police and your friends/family, but they got rid of that. I think it might still be a thing in India, I remember reading that somewhere.

Archeery - September 12, 2017, 12:33 pm

I was also watching the reveal live, I like it a lot! Definitely will be getting one. & the new Apple

Watch is pretty intriguing.

Mizzy - September 12, 2017, 12:35 pm

Not a fan of Apple.

But the iPhone X is dope , DAMN

Sickness - September 12, 2017, 1:18 pm

As always, overpriced shit and Emojis on 3D ultra lul.

Cammy - September 12, 2017, 1:19 pm

The iPhone X looks so god damn ugly. What the fuck were they thinking?

Big Man ? - September 12, 2017, 1:20 pm

Don't really see why this is an issue, are you transporting drugs or sex trafficking?

Korvo - September 12, 2017, 2:09 pm

I think the iPhone x looks pretty nice. More screen, less bezel. I might actually sell my android phone and switch back to iOS when the X comes out.

Wireless Network - September 12, 2017, 2:11 pm

I'm excited to finally try iphone and IOS. Gonna get iphone 4 when these gets out.

Well you will still be able to unlock it with a passcode. But faceid will be much more convenient than touchid or passcodes anyways.

Brandi Love - September 12, 2017, 2:31 pm

I think the Samsung Galaxy X looks way cooler, to be honest. They have actually changed something noticeable on the phone. I'm more of a one plus fanboy though.

SIM-403479 - September 12, 2017, 2:35 pm

I just dislike how the price has reached 1k.

They didn't change something noticeable on the iPhone X?

Tostig - September 12, 2017, 2:41 pm

Sofu - September 12, 2017, 2:46 pm

I want a X Plus though. That's the only thing.

The X is already bigger than the iPhone 8 Plus

airhawk - September 12, 2017, 2:52 pm

Looking amazing! Although I'll be holding off buying this year.

I'll still be waiting for full body resolution display with sound vibration (for phone calls, so we get a true full body display), OLED and a 4k resolution.

Is it really? I was really hoping the lack of frame on the screen would lead to a smaller form factor.

iPhone 8 Plus is 5.5 inches of screen real estate while I believe the X is 5.8

Adob? - September 12, 2017, 2:56 pm

I don't like the idea of a completely glass phone. Not my cup of tea.

Means harder to repair etc.

GoFlex - September 12, 2017, 3:02 pm

Face ID seems like it could be problematic, gonna wait until they perfect it.

Thinking of just buying an Apple Watch with cellular and iPhone SE for just over half the price of the X - I can't be carrying a £1000 phone in my pocket.

SIM-3387369 - September 13, 2017, 12:41 am

I don't like how there isn't a home button anymore. First they removed the aux and now they've removed that. What are they going to remove next?

Honestly, it looks like it'd be easier to accidentally crack too. The screen is intimidating in my opinion.

i think they will remove the speaker next so no more phone calls

VirtualFrost - September 13, 2017, 2:13 am

Nice updates, but still won't be upgrading. Still hate there's no earphone jack.

What the fuck were they thinking?The only thing I hate about the design is that the top left and right corners and then it curves around the speaker/camera. I would have rather seen it just be completely flat along the top.

I believe the iPhone 4 was the last one they made with glass, I guess you could somehow compare it with that and see how users found it.

SIM-1349466 - *September 13, 2017, 2:35 am*

Prob gonna get the 8, currently have the 6s.
The X screen really bothers me.

Techius - *September 13, 2017, 3:46 am*

Looks retarded. I hate the camera dip on the front, if anything. At least the back looks nice,
