Thread: [\[FREE\] Guide to E-Whoring: Snapchat // Q&A](#)

Pre-eminent - September 12, 2017, 2:59 pm

I've written a complete guide on E-Whoring on Snapchat with an iPhone.

Requirements:

- Must have 100 posts
- Must have been a member of HF for 2 months

If you are interested in the guide please leave a post on this thread, and I will PM you the e-Book.

Thanks for reading ?

i have couple questions

1. how are the priedings
- 2 . what do you post on the snapchat time line to gain clients/customers

regards

Price range varies a lot but never sell your videos and pictures too cheap. I usually charge \$5/pic, \$35 for custom videos and \$15+ for pre-recorded 2 min videos. You could, however, charge more / less by asking your customer how much they are willing to spend / how much they think you are worth.

I usually try to make it look like a real daily my story by posting images from Google that I have downloaded. This could be a snap of her breakfast -> then a semi nude -> new pic of her car -> pic of a restaurant -> pic when she got home and finish off with 'Hey guys, I'm live on snap now if anyone is interested in buying pics/vids'.

Basically, plan the whole day for your E-Whore girl the day before and make it sort of believable this way.

Nice guide for newer people that wants to eWhore on iOS, everything looks good.

EDIT: I WOULDN'T BY ANY CIRCUMSTANCES REGISTER YOUR NAME ON AMAZON YOUR EWHORE NAME

You will get locked almost instantly after your first few payments if you have bad billing addresses, fake names, through this site. Amazon will not DO anything if you have your real identity on there. Under there ToS, the customer that sends ANY gift cards to a stranger on the internet, you profit off there mistake, YOU can not get in ANY trouble for this AT all.

Thanks a lot for the kind words ?

Was not quite aware of the recent Amazon update, but it should still work if you use common first & last names and redeem the giftcard on your main account but only use the fake one for receiving.

Yea I use my real identity through amazon and receive from fake email, nothing can happen cause its there mistake, worst that can happen is your amazon getting locked lol.

Amazon is getting money through it all so they're not going to give a damn either.

Invest your earnings on kik for a 5c on facebook marketplace or one that is 100-150 and use that to eWhore, You're guaranteed to make your money back cause Snapchat is so unsaturated and more people that have money and want to buy.

Also how do I disable this full zoom on images I select? Thank you, and I'm not sure if you can disable the buttons, but you could always disable the microphone in general -> settings -> snapchat++.

For the pictures you should click on the 9:16 dimensions and then zoom all the way out, this will give it the proper iPhone camera look.

It's bullshitting and finding faceless videos, you need to be smart, if they just want something that's too much and no girl can do audio over that for example screaming their name than it's hard.

Well if its "custom" they're going to want to have a "custom" video. Which means whatever they want. Which leaves the pending question of how do you send a "custom" video without scamming?

I have girls hired for doing this, but as an alternative, you could download Pornhub videos of a girl similar to the one in your picture pack, and then just edit the dimensions in any video editor to make it look like it was filmed with an iPhone.

Chaturbate girls, Reddit girls, and amateur pornstars are more than willing to do this, however, it requires a larger budget but you can request custom vids & pics as well when paying them monthly.

If you think its bs idc.

What would I gain from making a tutorial then lying about how I send them custom videos, not everyone does it the same way I E-Whore. And to be able to afford girls to do this kind of thing you must have made atleast a few hundred bucks from regular E-Whoring which is why I gave an alternative.

(Sep 12, 2017 02:59 PM)WolfBoss Wrote: [\[CITE\]](#) Snapchat Guide to E-Whoring: By [Noceur](#) & [WolfBoss](#)

Introduction

Welcome, to the [E-Whoring](#) forum of the [Beginner Hacking](#) section.

In this thread, [Noceur](#) and I will be covering the basic topics of Snapchat E-Whoring to get you started.

If you have any questions regarding E-Whoring in general or have troubles setting anything up, feel free to leave a post and we will try and help you as fast as possible.

Identity

When it comes to E-Whoring one of the most important things is to have set up a fake identity.

This requires you to find a fake name, age, location and then register a matching mail, paypal and amazon account with this information.

Down below we have created a form that we want you to fill out and save, on a word document on your computer.

Take a daily look at this form and keep it as a reminder, as it's quite important to stay in character when E-Whoring.

A lot of customers prefer to have some sort of relationship with the girl before handing them their money,

so you should never make it too obvious that you are only after their money.

iPhone setup

As many of you experienced E-Whores know of, the old method to send live pictures and post Snapchat images from your gallery by using the application Casper recently got patched after they shutdown.

In this part of the thread, we will be teaching you how to setup an alternative that works just as great.

Follow these steps and you should be all setup for E-Whoring on Snapchat

?

Step 1

Find a high-quality picture pack from the E-Whoring forum, that contains a lot of pictures and videos.

Once the installation of the pack is finished, you need to compress it to a .zip folder instead of .rar as iPhone's can't open Winrar folders.

To compress a folder:

1. Locate the file or folder that you want to zip.
2. Press and hold (or right-click) the file or folder, select (or point to) Send to, and then select Compressed (zipped) folder.

Step 2

After the compression has finished, you need to upload the .zip folder to any file host of your choice.

I recommend file sharing hosts such as MEGA & Dropbox for this purpose.

Step 3

In this step we will be downloading the [iZip](#) app which is needed to open up our .zip folder from earlier.

Search for 'iZip' on appstore to download this app.

Step 4

In most cases the regular Safari browser will crash when downloading a large .zip compression, therefore we will need to download the [Puffin Web Browser](#) so we can avoid this problem.

Search for 'Puffin Web Browser' on appstore to download this app.

Step 5

Open up the Puffin Web Browser that we downloaded earlier, and download the .zip compression you uploaded.

When the installation is finished you need to click on the 3 lines/menu on the upper right corner of the browser.

After that you need to find the small Download icon and open up your download with the 'iZip' application we installed earlier.

Open up the 'iZip' application and click on 'Files'. Here you should find your .zip compression that we downloaded.

Click on the file and it will ask if you want to extract all files, click 'ok' when this message pops up.

Now locate back to the 'Files' folder inside 'iZip' and you will find another version of your folder but without the .zip extension.

Click on it and then click 'Save' on the bottom right corner, and all pictures should be saved to your phone gallery.

Step 6

In this part of the tutorial we will be covering 'Snapchat++' which will allow us to send pictures from our gallery.

Visit [Appvalley](#) on your iPhone and click on 'Install AppValley Native'. Once the icon has loaded on your home screen,

go to your iPhone 'Settings' -> 'General' -> 'Device Management' and click on 'Jiangsu Shenzhou Xinyuan' then click 'Trust'.

Now you can open the AppValley application and download Snapchat++ from there.

Step 7

Now you are all setup for E-Whoring on Snapchat, but you still need to find some traffic.

Thanks to [dopepizza](#) for making a compilation of traffic sites, this makes our life much easier. ?

List of sites:

Tips n' tricks

Never send the first snap

Wait a few minutes when answering customers Do not waste too much time on time wasters

Do not make the preview picture too revealing

* NEVER scam your customers

We hope this guide for E-Whoring on Snapchat will help you make some cash.
If you have any questions feel free to post them. ?

not bad my dude

I recommend you make your own packs if you know a girl who is willing to work with you. Otherwise, it is better to use premade packs as the customer will usually tell somethings up if its a different girl on each video/photo.

Is the PayPal verified on your real name or is it a stealth verified PayPal? Have you ever considered selling through sellfy? Also, let's say you receive the money from sellfy, what would you say if PayPal was asking questions about what are you selling?

I have 2 Paypal accounts. One which is verified with my real name etc. and a secondary Canadian PayPal for receiving payments. I usually transfer the money as soon as I receive it to my main account. PayPal usually doesn't ask any questions as long as you deliver what the customer paid for.

Great, thanks, do you also have any tips for converting that money to withdrawable money to bank? I was thinking of getting them through Shopify but that screams money laundering, also thought of filling up my account's balance at PopAds or something or just getting Sephora Gift Cards. (Amazon doesn't ship to my country unfortunately)

Thanks for the quick response mate, great thread. Good luck with your selling!

If you have a secondary PayPal account which is verified you can withdraw the money directly to your bank account with no trouble. Shopify etc. might work as well, but just keep in mind they take some percentages as well.

Got the method, since I'm ewhoring for a couple months now I knew the basic stuff all, this would be handy for people wanting to start ewhore for Snapchat. But I also learned something new how i transfer all the photos to my phone pretty fast. I first did it through whatsapp on my pc but that taked to much time.

I would recommend this for people want to start ewhoring.
