Thread: [img tags not working when creating thread?](#)

Pre-eminent - September 12, 2017, 3:07 pm

Hey guys,

So I just finished writing up this thread <https://hackforums.net/showthread.php?tid=5716464> with Noecur but for some reason, the banner image won't show even tho I have it inside the img tag.

Is this a problem on my end or HF?

Cammy - September 12, 2017, 3:08 pm

Try manually specify the width and height with [img=WxH]

Sometimes a server that handles the images stops working for a little while

Oh I just saw it's in the ewhoring section

Images aren't allowed there bro
