You clearly are broke if you think it's expensive to achieve level 100.
Even so calm down, it's not your acc so you shouldn't argue what people think the account is valued at.

Either way it is a nice main account to use. But I wouldn't pay \$100 for this. More like \$70 or a bit less.

I wouldn't sell it for \$70.

I can respect that.

Not saying you would but that's what I would pay. Since I am not going to be paying retail for a level I can achieve for less.

did before i edited it out bc i didn't wanna seem like i was trashing the sale.

100+ steam account levels don't go for top price no more, you see lvl 50s selling on here for 30\$, 80s for 55\$ and this one specifically I saw with 250 games (ok couple humble bundles but had all the AAA titles + that aids).

I've bought multiple lvl 100s and above off of here recently for under 100\$ it's just not the same price as 8 months ago sorry bro :/

Clearly you are after getting those useless awards lol. And of course I should call people out for complaining about the price. If you don't like the price then don't post? God damn hypocrite lol

That's good for you, let OP sell it as a price he wants though

Ok replicate OP's exact same account for the price of a "couple keys". Go on buddy =P.

Sharjah - September 13, 2017, 1:31 pm

I prefer selling it at my own price. Overpriced or not, I won't sell it for anything less. Would much rather keep it and not in a rush to sell

Sharjah - September 14, 2017, 5:15 pm

I already have a 125\$ offer, but I declined. I know what my account is worth compared to the market.

Sharjah - September 16, 2017, 3:24 am

Still for sale. Contact me with any questions

ChnK - September 16, 2017, 6:26 am

Level 100 is like 40\$ worth of keys, the rest depends on the games it has

I don't believe it's \$40 of keys, but thanks. Keep the sales trash in PMs

It's 40 keys which totals to around \$80. Do your research before you post.

Nice account OP, good luck with sales.

Nice account OP, good luck with sales.

Let's see.

Keys on bots are worth 1.92\$.
Bots are selling 25-27 sets for 1 Key. (Let's make it to 26 sets)
Level 0 to 113 is = 69600 EXP

Keys = 1.92\$
26 Set = 1 Key
1 Set = 100 EXP

$69600/100 = 696$ Sets
 $696 \text{ Sets} / 26 \text{ Sets per key} = 26.76 \sim 27$ Keys
 $27 \text{ Keys} * 1.92\$ = 51.39\$$

So it is 51.39\$ to get to level 113, which is a little bit more than what I said because I did the math for level 100.

Do your research before you post.
