Thread: [Profiles taking abnormally long to load](#)

Orgy - September 12, 2017, 6:34 pm

It seems to take longer than usual to load any profile. I've tried from multiple machines as well as from multiple physical locations on different connections. Any other page seems to load fine. Consistently taking longer than 6s to load a profile.

South East USA, if that matters. Chrome, if that matters too. I doubt either matter here but _ (?) _

Alice Dee - September 12, 2017, 6:36 pm

Same thing is happening to me. I'm from New Zealand.

(Sep 12, 2017 06:36 PM)Parks Wrote: [\[CITE\]](#) Hmm, south east usa huh? what city and state are you located in?

Nice way to go off topic.

Saltpeter - September 12, 2017, 6:37 pm

Now that you mention it I'm getting the same thing. I'm from up north.

LastSession - September 12, 2017, 6:37 pm

From Europe here and I experience the same. Only with user profiles as OP stated

Confound - September 12, 2017, 7:01 pm

Also experiencing the same lag - fairly bizarre that it's only user profiles.

vad0x - September 12, 2017, 7:03 pm

same thing for me, thought it was my internet lol

Not Your Average Orange - September 12, 2017, 7:15 pm

Same here. I'm in Canada.

Trappy - September 12, 2017, 7:20 pm

Same here in the west coast.

Targus - September 12, 2017, 7:57 pm

Profile takes longer to load for upgraded users (5-7 seconds), for normal users it loads relatively fast (2~ seconds).

lengthy pics that exceed a conventional 1366x768 screen [\(Click to View\)](#)

Targus - September 12, 2017, 8:06 pm

(Sep 12, 2017 08:01 PM)LastSession Wrote: [\[CITE\]](#) Is that your second HF account?

Eh? You can get a fresh list of new members if you click on the "Members" tab, and the other L33t user was from someone who posted in this thread.

Horus God - September 12, 2017, 8:10 pm
Same Problem 7 seconds for load.

SIM-2875347 - September 12, 2017, 8:11 pm
I thought my internet was just lagging for no reason, wierd.

Yin Yang - September 12, 2017, 8:14 pm
I just noticed this issue as well

Joy - September 12, 2017, 8:15 pm
Same issue for me.
As another guy said non-upgraded users profile are loading relatively faster than the ones who upgraded.

HuntedCS - September 13, 2017, 3:36 am
Having the same issue, Central US.

test - September 13, 2017, 3:40 am
Australia and getting the same issue on Chrome. Wouldn't say it is extremely bad but there definitely is a difference between other pages and profiles.

i thought the same, was gonna restart my internet

Elitas - September 13, 2017, 4:34 am
Seems to be the same as the showgroups.php page. Real slow! ://

Chloe Price - September 13, 2017, 4:42 am
I am also having this issue.

The showgroups page has been really slow for me for quite some time already, my profile takes around 7~8 seconds too since today (?). Think it has to do with groups though, as it seems that those who have a group (primary or secondary) seem to have long load times. Anyone knows a member who isn't L33T, UB3R or 3P1C but is in a secondary group to test it out?

Maybe a group leader/owner can add a new member to their group to test it out and check load times when they aren't and when they are in the group?

SecurityCult - September 13, 2017, 6:25 am
I was wondering what was up with that must be on HF's server side I guess

Omniscient - September 13, 2017, 6:46 am
Should be fixed now. Tunnel went offline.
