Botnets types

Free botnets you may use(with source/builder)

Paid botnets you may use(sales threads, contact details etc.)

Offshore servers and bulletproof domains

Setting up Virtual Private Server(centos 6,7)

Setting up domains

Dealing with botnet panel

Crypting and dealing with builder/executable file

Spreading methods(5 HQ methods so far)

By the end of this month will push v2 version with new methods.

I have sent one vouch copy and currently im waiting for review and maybe will give more copies.

z3ro-cool - September 15, 2017, 12:51 pm

I have received a vouch copy for this product and here is my honest review

This ebook is pretty amazing, owner gives an in-depth guide how to start your first botnet.

This ebook will work for anyone from any age group and any country. All you require is a internet connection, a brain, sometime and some of the methods you could use an investment but its not needed for any of this to work.

The methods range from relatively saturated methods to methods i have never heard of. Some of the methods in this eBook will be known to by many users, however it does contain some more complex methods.

E-book 8/10

Price: 10/10

Overall 9.5/10

Hi! I am about to buy me the BOTNET BIBLE Premium or Standart, because it really sounds nice and easy.

But firstly i have a few questions:

- To get "bots" someone must download a program or something from me that i can use his pc as a Bot, right?

- How much time do i need to get like 100 bots?

- What can i do with bots?

Have a nice day! :)

Have a nice day! :) - In short yes, you may use exploit kit to get bots, but its for advenced users and i havent covered it in my ebook yet, currently described few basic spreading methods and in the next 3 days will add private methods(never seen on HF)

- Depends on niche you use to spread, your effort, creativity, knowledge and method you use. Popular game or program is always a good niche and you can easily make 500 bots just in few hours.

You may see customer results, they got first bots right after setting up my methods.

- In short i cant answer to this question, because there is a lot of things you can do, imagination is your limit.

Seller doesn't offer the support as he promise.

The method itself for setting up a botnet can be found anywhere even youtube lol, the real thing is support since if you buy you don't know how to setup and might not understand few things.

This is NOT sales trashing since I am buyer of this product.

People give vouchers so with the same way I am allowed to say that i am unhappy with this product.

I WARNED, so if you want to buy feel free...

also I saw many replies from members who just sign up, just saying...

this is ONLY in last 2 pages the replies of people with less than 10 posts and newbies

Geass i have refused to support you just because you started crying instantly after purchase. You made shitty community alert against me because i have not answered your PM instantly.

Anyone else can meet me online on jabber everyday.

I have sent all purchases, check your emails guys. If i missed someone contact me trough email/jabber stdbool.h@riseup.net

New update is currently still being written, should be ready by the end of this week. I will raise the price of this e-book so grab it while you can for cheap.

Thanks boss.

New update is currently still being written, just need a couple more days to finish it. I will describe more topics, add new botnet sources and spreading methods.

If anyone need support im available on jabber: stdbool.h@riseup.net

Geass is just a multi accounteer trying to trash my sales. He is not the customer, never was, just mad competitor.

Im always ready to support my customers.

here is proofs he said his own that I bought his ebook:

<https://hackforums.net/showthread.php?tid=5727710&pid=55963125#pid55963125>

Guys, he lied about selling my his ebook to me, imagine just how much more lies he said.

(YOUR words on the link I posted, not mine, you said " You bought the guide in the middle of the night"

I closed that thread so you can't edit your post ?

note: again I am just answering, this time to the OP himself ? he said I am not customer, I proved that I was for the rest people by showing OP words on other thread.

edit: btw you said I am multi?

your whole thread is full of newbie members posts vouches with 10 posts in total, who is the fucking multi?

edit2: you say I bought your product 2 months ago, but it was 2 weeks ago LOL

I got transcation proofs so stop trying to deny the truth, thank you!

Boolean type - October 17, 2017, 5:06 am

Geass you have bought only beta release of my guide, tutorial you got is 2 months old, this is completly different product right now. You are not customer of this product, you are just annoying kid.

I support my customers everyday, but i do not provide support for multi accounters. Geass is just competitor, bought early version of my guide, because he wanted to trash my thread.

Once again, geass kid is not a customer of this product right now.

What does this include? Any free botnet links or so?

Or is it just a guide?

I'm confused. Isnt it simple to setup botnet with EK and then buy tier 1 traffic

Anyways, genuinely interested.

Do you offer any botnets yourself

Is the new guide update ready?

Alien8ed - November 6, 2017, 10:40 pm

Hello ?

I'm interested in your premium guide, but firstly, I have a question:

What would be the budget for a small botnet? (1k to 3k bots for example).

Thank you very much for your time.

Boolean type - November 7, 2017, 3:26 pm

Update will be released max in 7 days i had some IRL things.

50-150\$ is enough to start a small botnet(1-3k) if u use cracked/free source.

beuzathor - November 18, 2017, 7:21 am

there is a problem with your paypal account.

When, i want to buy your product paypal say this account can't receive paiement.

mrbones2015 - November 19, 2017, 1:32 pm

when will the updated version be finalized?

k245nx - November 20, 2017, 3:03 am

when you release the update?

spiritual satanism - November 20, 2017, 4:16 am

commenting so I can come back here :D

Boolean type - November 22, 2017, 9:35 am

Update is ready but i have problems with my paypal, thats why i havent released it yet.

I hope i will fix it asap.

You may buy with bitcoin or other crypto, PM me if u want to pay using other method.

Boolean type - November 28, 2017, 2:08 am

I have fixed problems with my paypal, sales are going back.

I will release update within few days.
