Thread: [la there some program that do same thing multiple times at once](#)

Mr.ious Mystic - September 15, 2017, 5:59 am

Hello, im playing some game on private server, and there are some ingame currency that cost real \$\$.

The thing is ingame currency can be sent through website from 1 account to other.

Is there anything that could make it send few times when i click send or smth like that? And would that work myb? Website doesnt seem to be protected very well

Thx ?

This chrome extension its what you need:

<https://chrome.google.com/webstore/detail/imacros-for-chrome/cplklnmnlbnpmjogncfgfijjoopmnlemp?hl=en>

Extension named: iMacros

Its easy to use, if you mis understand anything just google here is a lot of tutorials about this extension.
