Thread: [Minimal Pizza Logo Concept](#)

Saul Bass - September 16, 2017, 11:07 am

Here is a very minimal Pizza logo that I created.

This is really good! You got the minimalist idea pinned. One thing that kinda bugged me was how the logo wasn't the same height/wasn't proportional to the other characters in the word "pizza".

Damn this is extremely nice. Great job OP.

Ow i love seeing your minimal logos. They are always so smooth for the eye.

Pretty straight to the point. No sparkles no old fashioned 3d effects just plain simplistic ideas that go straight for the words in your mouth, illustrating perfectly the desired concept behind it. Well done.

Yeah I wanted the A (Pizza slice) part to stand out more than the rest because I wanted it as the focal point.

this is super simplistic and clean, but if you wouldn't have mentioned that it's a pizza logo then i would be confused as to what it is

Would the rest of the text not have given it away a little bit?

Love this, OP. Easy on the eye and clean.

I kinda liked how it wasn't proportional. Then again I am unorthodox.

Nice and straight forwards, looks professional what more can I say.

Good job, and keep up the good work.

That looks really nice, although I don't think there are pizzarias with modern styles so I don't think the style would fit to a pizzarias.

This is something that could fit New York or such.
