Thread: [Help with virus scanning sites.](#)

Tsach3v - September 17, 2017, 1:28 pm

Ok so all the non distribute free scanning sites are gone , and before you start commenting yes yes ik those sites im asking for help distribute. So when i try to go to nodistribute.com it gives me an error. So then i was like wtf. But then it works in school when i try to access it. Then i went on my pc and even virustotal doesnt work. I tried using vpn and changing my dns to make sure my isp isnt blocking it but still not working. Whats the problem? I tried using different browsers. SS of errors.

Edit: all of the scanning sites dont work. Jotti , metadefender same thing. Every other normal site works though.

NYANxCAT - September 17, 2017, 2:00 pm

Go C:\Windows\System32\drivers\etc\

open "hosts" with notepad as admin

delete "nodistribute.com 127.0.0.1"

damn , thx bro any idea why all of them were there??? there were like 20virus sites.

[quote='i-crackapp' pid='55874886' dateline='1505682057']

Go C:\Windows\System32\drivers\etc\

open "hosts" with notepad as admin

delete "nodistribute.com 127.0.0.1"

I cant save it after editing... How do i run notepad as admin??

NYANxCAT - September 17, 2017, 2:55 pm

press windows button on your keyboard, type "notepad" --> right click run as admin

File -> Open C:\Windows\System32\drivers\etc\hosts

yeah i tried it I did that it didnt show when i went to properties and made it as administrator but still cant save it, but i found a fix. I just deleted the hosts file. Thanks a lot bro. Any idea why all the virus scanning sites were there though?

NYANxCAT - September 17, 2017, 3:03 pm

didn't show cuz you need to switch from txt to all files on notepad LOL. undo the delete and just edit the file...

you seem to use a crypt software from hf, some coders block users from scanning.

EASY_HAX - September 17, 2017, 3:03 pm

It happens sometimes when you install crypters or packers
