Thread: [== SECRECY == NETWORKING AND SECURITY STUDENT SYSTEM == SLOTTED RC](#)

Pronouncer - September 17, 2017, 2:53 pm

Who are we?

We are a small collection of skilled individuals within different fields. We have the firm belief that knowledge should be free, however, we do also believe that not everything should be shared hence the name secrecy. We all share our methodologies and skill working together for great benefits.

What makes us different?

We as a group intend to complete many different objectives. We have an efficient organization system along with valid leadership, we have larger plans for the community both onsite and off. We will definitely change the way things are done.

Sections in Student Scheme

Networking

Security

Development

Programming (Numerous languages and a big section on C++)

(Will take about 6 months of lessons, it's a long-term system we are prepared to teach and help)

Where you can find us:

For the majority of this student mentorship, we will use Discord.

How to join Secrecy Student System

To join secrecy student scheme please fill out our recruitment form and post your response below.

I fit in the schooling system, because I'm willing to dedicate my time to providing the community with help whenever needed, and I am also very willing to learn from the school system. I believe that everyone has something to share, and we could all learn something new from each other.

Absolutely.

I do not have much of a skillset necessarily, but i am in the course of absorbing as much knowledge as possible.

;))

Why you feel you would be a fit for the student system?

I would love to expand more knowledge to be able to help others that might not have that experience and help companies/businesses. I thrive to learn more day by day to build my abilities and strength to eventually take it out to the real world.

Are you willing to stay dedicated and active within the system?:

Yes. I don't tend to leave since, This is a great opportunity to help myself but, help others.

Whats your current skillset?:

- Networking: Moderate knowledge. Doing a Diploma in Networking and Security.
- Pentesting: Over 4 years experience and possibly a CEH qualification if I take the full test.
- Linux: Coming up to 2 years with Linux knowledge. Learnt my skills via codecademy and then started to run home servers with Websites/MC Servers/Pentesting.
- Python: Started a couple months ago but, I have a base understanding on how to code python.

Would you want to join secrecy after the schooling system?

Yes, for sure. I would love to expand the group to be a well known group of what has started and what we've finished. I think this will be a great opportunity to not just help me but, people that would love to know how to do stuff and being about to support them.

Thanks,
