Thread: [\[GUIDE\] The Most Effective Ways to Climb](#)

Seductable - September 18, 2017, 5:19 pm

Hey guys, I recently created a guide for beginner/intermediate players about tips and strategies that are sometimes forgotten or overseen along with the mentality of how to climb elo!

Please give it a view and any feedback is greatly appreciated!

Thank you.

You need a new mic, but pretty good guide overall.

i never really understood the point of videos like this, 90% of the time they don't actually give you any useful information and there's 1000 videos just like this

somehow you got angry making this as well

1/5

I don't think there is really a guide to ranking up. It's just about becoming an overall better player and hoping to get good teammates. Saying that, guides are always nice to have and can be useful in some way so good work.

The best way to rank up would be having fun while playing league, since that's what matters.

Pretty good guide, I can only say the same as the others before me.

The key to ranking up is playing a lot and playing your best and also getting a good mate you can duo with.
