*Please PM me only about my review, I am no way affiliated with the user selling this product and was given a vouch copy to provide an honest review.

Thank you [Baba Yaga](#) for letting me review you're Proxy Product!

The Seller (AKA: Baba Yaga)

I was interested in a service that would give me the best speeds for downloading torrents and private browsing. I had reached out to the seller about my needs and right away he had offered me a vouch copy. Throughout our conversation, he/she is very respectable and mature and takes everything seriously, so if there is a problem or concern there is no problem for you as the buyer to get it resolved in a respectful time frame.

The Service:

I had tried 2-3 High Tiered VPN services that were not getting what I needed. Once I was given my proxy I was able to connect to everything almost instantly. But importantly I am getting way faster speeds than I initially was getting with the vpn services (Check the screenshot below). I had also tried the product given to me on sites I was banned from, Checks out I am officially unbanned :) from those sites thanks to Baba. The only Con I have about this product is that I was not able to get this working on IOS, User had told me that people were able to get this working on android but he will look into the matter anyway.

Speeds:

I wish there was more to say, but I am a happy customer and once my proxy runs out I will happily buy this product from the user.

Thanks,
Mac

What exactly is a residential IP?

Prawnster - September 19, 2017, 9:55 am

These seem extremely similar to those sold on luxsocks? Is this where you get them from or are they a private source?

Mobb-Deep - September 19, 2017, 9:56 am

(Sep 19, 2017 09:55 AM)Humo Wrote: [\[CITE\]](#) What exactly is a residential IP?

it belongs to someone's house and not a data centre, in the eyes of the internet Res ip's makes it seem like it's you sitting in a house.

(Sep 19, 2017 09:55 AM)Humo Wrote: [\[CITE\]](#) What exactly is a residential IP?

Residential IP is an IP address that is meant to look like you are actually located in a home/residential location, hence the name. Most proxy providers provide datacenter IPs which are easily picked up and blacklisted by some sites (Paypal for example).

These are private source proxies, not sold on luxsocks. Though those proxies are of good quality, I assure that my sources are better than theirs ?

Hey man by any chance can you get Auto-Rotation Proxies? I'm looking for different countries. Let me know if you can get them, prefer the ones that are rotating on many proxies not just a couple.
