I was able to scrape 84675 Elite proxies!

UI could be a little better but its very easy to use and again works very well!

I definitely recommend picking this up if you need a good proxy scraper!

Sorry as this is probably a tad of a noob question but is there any known way to check the geo-location of the proxies for a big list. Definitely interested as I need some SOCKS5s. Thanks!

Atm this tool just gets the proxys, there will be an update released that will also check the proxys and get the geo info for them. There are many site that can get this info that you can use until i release this update.

Thanks
