Rambos - September 21, 2017, 1:50 pm

I know some people on here used to be able to unban you from h3 online, is it still possible?

If so, does anybody know who can do it? Willing to compensate

What does it matter...?

You don't get any of your stats back lol.
Shouldn't have cheated in the first place.

Uhhh...

You must of not been here when H3 was popular.

This forum wasn't all about cheating.

Just cause it has the name "hack" in the URL, doesn't mean it's a forum specifically for cheating...

lol.

In fact, anyone who posted about cheating would get flamed.

Your post is 100% correct but you can't blame new members to HackForums for assuming this forum is mainly used for hackers/cheaters.
