Thread: [Nike x Adidas Air Force NMD R1 Illustration](#)

Bringing you another sneaker mash only this time with ones that are a bit more popular. This was just a practice session on a rainy saturday and you know I love my hunting and arctic camos along with two simple color versions. I tried experimenting a little with the way I showcase these. I've seen some interesting things but I'll keep them for other projects and see how that goes. Which one is your favorite?

Feedback and criticism is always welcome!

The first one is my favorite.

I would probably buy it.

I would love to see this as an actual shoe. They look really nice, and with some dope colorways, they'd look even better.

As a shoehead, I simply love this.

It matches nearly every detail of the actual shoe in real life.

Lovely.
