How does sharing work for osbuddy can both of you play at the same time?

Yeah, there's no exclusive login. Literally 100 people can use your Pro features at the same time.

There's a free OSBuddy Pro thread somewhere, you should probably check that out if you're still unable to find an account.

gigajew - September 25, 2017, 5:22 pm

No need to share accounts anymore. Just get on a free account and activate it using this <https://hackforums.net/showthread.php?tid=5724632>

Just an FYI but I use dreambot a fair bit and I liked the functionality it had in terms of reducing performance when doing a bot farm & automation.

Worth checking out but not as many decent free scripts and not as big community.
