Thread: [Snapchat Ewhoring Casper](#)

Super Trapper - September 23, 2017, 4:18 pm

I have an andorid phone and I've used Casper just to screenshot nudes that are sent to me, but I know you are able to post things on your story from your camera roll with it saying "from Camera Roll" in the top right of the snap story. I went to log in today and and there is a message that says "Unfortunately due to legal reasons Casper is no longer available" Is there any other android app that would allow me to post things to a Ewhore snapchats story?

They are all paid or I can not find them, regarding compiling my own program can be done, I have seen videos but it does not work for me so I am in a hurry because I can not find a free alternative to casper ... Pffff :(
sorry if the thread is old I had not noticed

There isn't a free alternative, Spiral costs like 10\$.

Gotta spend money to make money

There actually are some free apps on here that people have compiled and are willing to add people to, you just have to find them.
