Thread: [What is your GPA?](#)

Cagey - September 24, 2017, 3:03 pm

I know not all countries go by this if so what's your average grade if you're not in your school system doesn't do GPA?

Mine right now is like a 3.9 I'm retaking some stuff to get it back to a 4.0 though hopefully.

What's yours?

wit - September 24, 2017, 3:04 pm

2.5

fucked up and too depressed to even care anymore

Nachfolger - September 24, 2017, 3:05 pm

Currently at a 4.0, it will go down soon though. Math is destroying me.

Why's that man? I mean a 2.5 is still passing isn't it?

Math is destroying me.

I'm more worried about calculus it just looks hard to me

I do have average B in school and I feel pretty stupid generally, however, I have pretty lucky because all teachers favor me.

juulstar - September 24, 2017, 3:08 pm

Mine's at a 3.8, I hope to get it to a 4.0 though.

\$ZEUS - September 24, 2017, 3:08 pm

I graduated high school with a 1.8. It's not good by any means, however I've made life work for the best. School is not for everyone, and I've never let my GPA hinder my life.

Why waste your time? Your GPA doesn't matter after you get your first job and generally anything above a 3.0 is acceptable to employers.

Loses - September 24, 2017, 3:11 pm

1.8 last year, gonna start trying this year so hopefully it'll be a lot better this year around.

I'm going to med school and want to get into a top 10 school so I need a 3.8 or higher plus a high MCAT this only really matters to those who go on to professional schools.
