Thread: [Custom Coded Crackers / Brute Force Programs + Source \(C#\)](#)

Jisatsu - September 25, 2017, 8:51 am

Details:

Coding Private Brutes for ANY SITE JUST ASK | Selling finished compiled project, which will be your personal copy.

(You can watch it being compiled if needed) and/Or buy the source to that project.

Also can sell the Brute source itself to be pre-configured by steps to work with any site same way.
LANG C# OR C++ (Optional) \$400

Brutes we have coded:

Netflix

Hulu

Spotify

Directv

247hd.tv

Forums

Shops

We can create brutes for just about any site though.

Why choose custom program over multibrute program:

Multibrute program are fine tuned to work certain ways. Our programs generate everything it needs on each page it visits and keeps what's needed till the process is finished out. Multi-capture programs, multi-crackers, this is all possible with our service.

We can also do sites that have captchas! We personally use antigate for our captcha bypass system. It works for google's recaptcha system, and tons of other captcha softwares! Any anti-captcha site can be used though. We have tested antigate personally with tons of captchas softwares and seems to be quickest and most accurate in our works. Statistically, it is the better option.

How We take payment: For projects we deem small. We will show provided Proof of program in the functioning state agreed upon in the terms. Then payment MUST be made before any trade from our end will be made. ONLY TAKING BTC at the Moment. (Paypal for select few) For some projects we deem larger (will require more time) we may ask for half or more up front. (Takes awhile to code some of these projects, and some people end up not following through with buying once we have it made and ready to go.)

Can code brutes for sites with IMAGE/Re-Capture v1/v2("Are you Human" box type Captures Any of them) Google's Recaptcha is supported also.

Project Time-frame: Projects usually take 1-Hours(Most Likely) - 2-days (If Complex)

Prices:

We really don't want to spend time on less than \$60 for the program, but... Depending on the site,

the price will vary. Shoot me a message with full details, links to the site. What kind of capture, if any, you are wanting. Just keep in mind each feature will unfortunately raise the price and time we are putting in.

Source will be a minimum of \$200. (Will vary)

Contact Information:

Skype: xsickxskills (Sales/Support - Programmer)

XMPP:

xsickxskills: xsickxskills@securejabber.me (Sales/Support - Programmer)

I can show a few screenshots via PM or skype. I'm willing to give copies of our Netflix brute out as a proof of successful working program and our general concept.

Netflix Example:

I have other example if you want to see them also.

A different design can be made also.

Our aims are quality, stability, and precision.

Shoot me a message let's talk business.

John Player Special - September 25, 2017, 9:18 am

Conquer online is an 2.5d client mmorpg with a account panel on their website, captcha happens after 2nd or 3th fail.

Can you do this? Ifso for how much?

Pm me.

Jisatsu - September 25, 2017, 9:41 am

Pm me.

Have PMed you about this.

Just about any website can be cracked. There are certain websites though that require a bit more time. So some websites ofc are going to be pricy. Simple login sites shouldn't be too hard. Can even make capture for the program so you know what account is what.

Benoit balls - September 25, 2017, 12:03 pm

Looks like a solid service.

If there are any complex jobs you ever want to send my way, make sure to give me a PM!

Jisatsu - September 25, 2017, 2:18 pm

No doubt, preciate the kind words.

FamousHater - September 25, 2017, 2:19 pm

the cap in the netflix cracker seems usless?

who cares if it has DVD on acct lol

Jisatsu - September 26, 2017, 7:00 pm

Still offering this service, add me up. already got a few projects underway, and sold.

Jisatsu - September 29, 2017, 11:20 am

Hello everyone, just finished a few brutes for a few people. Taking on more projects now. Add me on skype, shoot me a PM let's talk.

Relcek - September 29, 2017, 2:37 pm

Interested, have messaged you on skype.

ruDEADASSmyguy - September 29, 2017, 3:53 pm

Vouch for xSickxSkiLLs!!!! very amazing crackers glws

Jisatsu - September 30, 2017, 7:56 am

Thanks for the vouch, still taking sales on. Add me on skype or PM me here, please post in thread to help me out too.

Thanks guys!

urk - September 30, 2017, 11:58 am

It's nice that you can deal with Google Captcha but can you explain more. Do you bypass different forms of captcha or do use sites like decaptcha to solve captcha. Just want to know if there will be any additional costs afterwards

Jisatsu - September 30, 2017, 12:35 pm

Yes we can do different forms of captcha, that's kind of what I was trying to explain in OP. Any sort of image captchas that are irregular is possible, just message me so I can test with antigate. Also, you guys can test captchas with antigate too, they offer tests on image captchas. If it is a different kind of captcha, just PM me so we can talk specifics.

9n8d - September 30, 2017, 1:50 pm

I have sent you a private message regarding a cracker. :)

Jisatsu - September 30, 2017, 6:55 pm

Have replied to everyone with ideas and interested. Come on guys, give me some good ideas if not anything.

Jisatsu - October 2, 2017, 9:00 am

Still offering this guys, shoot me messages. Willing to code other small projects that are similar methods to brutng.

Davy - October 2, 2017, 10:57 am

HMU if you can do Runescape.

SkimTek - October 2, 2017, 10:41 pm

pm me how much for a cracker for myfreecams.com

moyorules - October 3, 2017, 6:53 am

Can you code a brute for PSN and what is the expected cost?

Jisatsu - October 3, 2017, 7:57 am

Pming you guys now, PSN is a hard one but it can be done. Not for cheap. The worth of PSN is at it's all time high. But I heard accounts were getting locked because of some new PSN system.

Mycams sites, I'll have to check into it first, will pm you after.

Runescape has SSL pinning and haven't figure that out quite yet. Sorry. Once we do figure it out, you guys will be first to know.

Jisatsu - *October 11, 2017, 6:09 pm*

Hello guys, our team has room for a few more projects. Let us know if you have something similar in mind also.

Jisatsu - *October 16, 2017, 8:00 pm*

Our team has compiled a few more brute force programs this past weekend and welcoming new projects for this week. Shoot me a message, add me on skype/jabber, let me know your idea and we will see what we can do.

Jisatsu - *October 22, 2017, 11:19 pm*

Have time this week for a few more programs, hit me up if you need something done. C# full source able to be sold too.

Jisatsu - *November 2, 2017, 1:34 pm*

Still offering these coding services, add me up let's do businesss.

HoangDung - *November 21, 2017, 11:05 am*

Do you have tool brute for starbucks.com ?

Jisatsu - *November 22, 2017, 4:27 am*

(Nov 21, 2017 12:05 PM)HoangDung Wrote: [\[CITE\]](#) Do you have tool brute for starbucks.com ?

We have come across some more information regarding starbucks, and may have come a bit closer to being able to make one with fingerprinting bs.

Jisatsu - *December 7, 2017, 9:53 am*

Taking sales, hmu if you have any inquiries.
