Seems cool, got a video/pic of it in action? Is it an ingame radar or completely external from the game?

Battle Eye - September 25, 2017, 11:37 pm

Looks cool, honestly would like to see in action.

Slightly. - September 25, 2017, 11:49 pm

Is there anyway you could make this ESEA proof by having it output to a smartphone instead of the screen?

It doesn't work as simple as that and if he is able to do such a thing it would be 1k+ worth easily.

I doubt developer is competent enough, since he's selling a bSpotted writer for \$6 a month lol

I highly doubt this will ever be ESEA proof, and even then, it's gonna cost a lot more than \$12 lmao

BoliBerrys - September 28, 2017, 4:17 pm

Any ingame screenshots showing its work? Or a video?

Chloe Price - September 28, 2017, 4:19 pm

Any ban rate?, how is this less detectable?

What is "remote" about a simple bspotted radar?
