New Halo 5 gametype update.

HALO 3 throwback playlist.

All maps remastered along with same game settings and weapons.

All i was looking' for was the H3 ranking system.

Although this does seem pretty cool, wouldve just rather had h3 repopulated for the week since its a decade old today

They did a good job making replicas but that's gross af, enjoying the backwards compatibility though :D

Yeah i just saw a snowbound remake, it looks butchered.. Super shiny, just doesn't capture the halo 3 feel ?

Didn't play it, kinda basing it solely off gameplay i saw on youtube.. To me it just seemed too clustered and futuristic, but maybe just cause i haven't played it yet. Gonna have to check it out

100% agree.. They should have went back to classic halo movement.. Maybe this is their test for halo 6 ?

Playlist is fine, anyone bitching is because they haven't played it or just suck lol.

Spawns are a bit weird but the maps and gameplay feel amazing.

If this was ranked people would go crazy.
