Thread: [Forgotten credentials...](#)

Jeremiah † - September 25, 2017, 7:52 pm

So, I sent a help request a little over a week ago regarding this but, I forgot my email and password. Am I just fucked or? Im logged in using the "remember me" feature but I got a new pc so I need my credentials. Help ?

Ixxion - September 25, 2017, 7:52 pm

Go into your User CP and it will show the email you registered with, then reset password using that email.

Your account will be treated as lost then. You don't have access to your email nor do you remember your password.

Read about [Stolen and Lost HF Accounts](#).

The account recovery processing fee is \$20. Use the [Contact Us](#) page.

Elitas - September 28, 2017, 12:19 am

[Click here](#). You will the see your email address. Reset password on the address and then log back in!

James Burnham - September 28, 2017, 12:26 am

So your password is saved in your browser? Just go to the browser settings and check your saved passwords. You will see it there.

(Sep 28, 2017 12:26 AM)? Mr. Burnham ? Wrote: [\[CITE\]](#) So your password is saved in your browser? Just go to the browser settings and check your saved passwords. You will see it there.

I think he did not saved his password. His session is saved in cookies. OP take backup of hackforums cookies in case you are not able to get your password back and make sure you do not click on logout button ever.

Make your way over to <https://hackforums.net/usercp.php>

Whenever you get there it'll show your email address then send a password reset link to your email address once you do that you'll be able to sign in if you're unable to access that email you may be able to PM Omniscient while you're still logged in and use your IP history to recover your account but I'd assume that would still cost \$20 BTC/ETH if you need anymore advice towards this issue feel free to PM me and I'll do my best to help you troubleshoot.
