Thread: [Residential Socks](#)

Today I'm feeling like giving away some residential private socks.

You will receive one (1) residential socks in a random country that is NOT blacklisted.

The socks proxy will most likely work for weeks but sometimes it dies in just a few days and if that's the case I'll give you a new one.

Send me a PM (private message) here on Hack forums and I'll reply with the socks ip and port and also all details about country, operator and some other info.

I have a unlimited supply of these so everyone can get a piece of the golden cake.?
