Grailed is a site you can buy or sell used/new high-end designer pieces.

That is a really cool concept.

It's not often we see fan-made content.

Keep it up.

Nice job, I use this app a lot and would prefer this style to their current one to be honest.

The app looks awesome and I love how dynamic the slide-in looks. However, I feel like it might lag a bit on older devices (<iPhone6s). I may be wrong, but awesome job once again!
