The panel is user friendly and it has awesome features.

I tested everything on beta account and everything works like charm.

About the Panel 8/10
Friendly to the users but need some improvements.

Stability 9/10
Bot is really highly stable.

Definitely you should buy the Premium package.

thanks!

more doubts: can you use it just in one phone at the same time?

a example of how the soft/dashboard shows whatsapp monitoring?

must the root be with supersu or it can be with magisk manager? i tell this cause i know soft that works just with supersu method....

thanks!

SIM-3420445 - October 25, 2017, 8:34 pm

Yes ,because whatsapp will automatically de authorize the second one.

Big updates coming soon, buy now while price is at 50% off.

Upgrade will be given free to root customers only.

Don't ask what's upcoming, i also don't know how much exactly it will take us to integrate the new features.

The only i can gurantee is that you will enjoy them.

Mr.Black - November 29, 2017, 12:20 am

Does it have a remote file manager?

Is the connection going to be encrypted?

Does it support auto startup on the latest Android Oreo 8.0?

SIM-3420445 - November 29, 2017, 1:22 am

- 1) It is possible using linux commands.
- 2) wot connection are you talking about ?
- 3) It supports every device from 2.3-8.0

Mr.Black - November 29, 2017, 2:31 am

- 1) So there's no file manager interface, I must use mv, cp, rm, cd, etc.. right?
- 2) The connection between my device and the RAT is it encrypted in anyway?

Also it would be nice if I could see a screenshot of the control panel.
