Ultra Hacks - September 27, 2017, 10:49 am

Hello Hackforum users,

2 weeks ago I bought a "silent doc exploit" from Theo™.

<https://hackforums.net/showthread.php?tid=5705877>

Before I paid he says in a Skype conversation that the exploit works on Office 2017 on the latest version.

proof: <http://prntscr.com/gru64e>

later when I had issues with the exploit he said it isn't compatible with office 2017.

When I began with the fact that he said earlier to me that it works on office 2017 he deletes the message from Skype.

The exploit never works for me, he keeps telling that I didn't read the compatibility in the thread that it may only work on Windows with sp 1.

But after a few tries still not working.

He also told me it is working on the latest office 2017 silent and that was good enough to directly buying.

I wasn't very happy with the sp1 since windows 10/8.1 users don't have sp1 in the standard Windows installation.

And also that the office version works on 2016 and not 2017 he told me.

So the exploit didn't work and he doesn't a response to my messages (yet), he can be busy or away.

The price was 900\$ for a silent exploit that only works on the standard installation of Windows 7 with office 2016 and downgraded sp1 users on Windows 8.1/10

[I am not mad on Theo™ but he lied to me and the office 2017 was for me the reason to buy otherwise I didn't buy it]

ONLY serious people with honest answers.

Reeces - September 27, 2017, 10:51 am

If what you say is true, you should get a refund unless his terms state otherwise, but you'll need proof that he told you it will work on Word 2017 otherwise these are just claims.

Also, whether we think you deserve a refund or not is irrelevant, and staff do not get involved in Deal Disputes. But as I said before, for anyone to take your side or anything you'll need proof he actually said it'll work on Word 2017, because his thread doesn't say that.

M?xim - September 27, 2017, 10:52 am

He should refund. But I seriously doubt he will. That's quite a lot you paid, is exploits really worth that much?

Hello, that's the problem he deletes the message so I probably can't get a refund as you may seen in the first screenshot.

Hate to say it buddy, but you're stuck. You can't prove he said it and his thread doesn't state it. Situation sucks but this is why you should only deal onsite via PMs.

Maybe for the latest office 2017 where I paid for but not for an office exploit that is working on version 2016 and sp1.

HOMODIN - September 27, 2017, 10:56 am

If you bought it for to use it in Office 2017 and he literally told you that it works in that version of office then I would say that he should give you a full refund. However, "this message has been removed" doesn't really help. Even tho it shows that he doesn't want to stand for his claims and tries to hide it.

If you have any use of the exploit what so ever then 50% refund, but if none then 100%.

ryan? - September 27, 2017, 10:56 am

Few questions:

If this happened 2 weeks ago, why are you just now making this thread? What were his responses when you told him it didn't work and demanded a refund? What is the time-frame for him not responding?

Personally, that's a weird thing/part for him to delete unless it was incriminating so that alone makes me think he should refund you....but there are 2 sides to every story, so yeh. You should just post the log in a spoiler so people can make their own decision.

The exploit is still not working for me, he didn't support me yet.

But my question "Does it works on office 2017" and "Message removed" so for me enough.

I was waiting for his response and replies to help me with the exploit since it doesn't work for me. He didn't so that's why making a thread now.

As far as i know CVE-2017-0199 its an old exploit patched in april 2017 and this cve does not affect office 2017.

He lied to you, this CVE never worked for office 2017.

You should get full refund but acording to Theo history here, you will not see a single penny. There are several community alerts/scam reports on him, do your research next time.

It didn't happend 2 weeks ago sir,

The exploit was sent to him like 2 week ago, He said that he failed to make build, So i sent him Tutorial and a private video of making me Build and proof of working. But he still failed to build, (a week past in such). Then he asked me to show him on team viewer, i had urgent business meetings in real life, i finally came back and saw his thread.

OP will close this thread soon, as the full system compatibility is given on sale thread and exploit

works as promised. I have some haters on HF who will make bad comment sir, but i ignore them because my customers knows about the quality of services ?

This is getting rather clear and I'll have to change my "vote" to a full refund based on the following things.

1. Deleted messages, no feedback why you (Theo) deleted them.

2. Not one word about checking compatibility nor anything like that, just the following statement: "Yes exploit works perfectly over all office version and it is completely FUD."

Also, i am making it official on this thread, that you need to edit and close this thread once i have proved that exploit works perfect on all compatible systems.

If you do not help me because of this thread you are probably scamming you always need to Help the customer where he paid for whenever the situation is! I paid 900\$ for the latest office version as you told me and other members. This thread is what other people think about this maybe read all the commands and give a refund.

Me: Hey, is the exploit working on the latest office?

You: Yes.

After the customer gets issue and you tell them that they didn't read the compatibility in the thread you remove the message.

Here i would like to bring some important points for all other member:

- OP Visited my sale thread and did all research before contacting me.
- My sale thread clearly lists all compatible system for this silent doc exploit.
- OP Even verified by asking me compatibility and i never told him that this exploit works on 2017 office version (He also doesnt have any proof). He is just making false accusation.
- The exploit is fully functional and i have provided video proof of that on my sale thread.
- OP Specially demanded a video where he want to learn how to make virus build. I made the video and sent him.
- Before going out to solve real life works i told him to wait till i respond, but he opened thread.
- I very politely told him to lets resolve this and i am ready to show the working of exploit via team viewer.
- OP Doesn't want any support , OP is just looking to get this product for free by asking refund.
- My sale thread has clearly TOS where it says that there is no refund after sales.
- Also the OP has multiple account on HF and he is trying to create drama.
- I messaged OP on skype, so we could resolve it. But he replied to me by saying that he wants other people to know. and he did that actually, he created this all drama.
- There cannot be any refund for working exploit and OP is just looking to get it free.

This will be my last and final reply, i am leaving it on other honest member to see it clearly and look for all the proof that OP is providing. I do accept that i have some haters on HF, but it doesnt mean that i am doing any bad services. I have thousands of vouches from paid customer, only few like OP meets hater of mine on HF and create this drama.

Thank you ?

(Sep 28, 2017 06:18 AM)Theo™ Wrote: [\[CITE\]](#) Here i would like to bring some important points for all other member:

- OP Visited my sale thread and did all research before contacting me.
- My sale thread clearly lists all compatible system for this silent doc exploit.
- OP Even verified by asking me compatibility and i never told him that this exploit works on 2017 office version (He also doesnt have any proof). He is just making false accusation.
- The exploit is fully functional and i have provided video proof of that on my sale thread.
- OP Specially demanded a video where he want to learn how to make virus build. I made the video and sent him.
- Before going out to solve real life works i told him to wait till i respond, but he opened thread.
- I very politely told him to lets resolve this and i am ready to show the working of exploit via team viewer.
- OP Doesn't want any support , OP is just looking to get this product for free by asking refund.
- My sale thread has clearly TOS where it says that there is no refund after sales.
- Also the OP has multiple account on HF and he is trying to create drama.
- I messaged OP on skype, so we could resolve it. But he replied to me by saying that he wants other people to know. and he did that actually, he created this all drama.
- There cannot be any refund for working exploit and OP is just looking to get it free.

This will be my last and final reply, i am leaving it on other honest member to see it clearly and look for all the proof that OP is providing. I do accept that i have some haters on HF, but it doesnt mean that i am doing any bad services. I have thousands of vouches from paid customer, only few like OP meets hater of mine on HF and create this drama.

Thank you ?

And again lying of course I don't have proof because you delete the fk message from Skype you

said to me it is working on the latest version of office 2017

proofs:

4. <http://prntscr.com/gqfljd>

All the comments lead to get a full refund you are one big liar seriously give the 900\$ back this shouldn't be a whole problem.

As I said earlier you are one big fat ass liar I paid for this exploit because you said it is fully working on the latest version otherwise I never paid for it!

When I had issues you said I didn't read the compatibility in your thread when you said clearly it is working on the latest version.

So this is how you going to work on hackforums.

People ask for if it works on the latest version you said it is fully working so people buy the exploit.

They have issues with the exploit and you said they didn't read the compatibilities in the thread.

They won't get a refund. you remove the messages so they don't have any proofs
That's how you going to work, nobody accept this give a refund Theo this isn't normal what you do.

Quote:OP, If you want to resolve this issue, (i have already helped you by sending you video proof of working also i made one more video where i showed you how to make build).

But, i'll do it on team viewer for you if you want it to get resolved.

Also, i am making it official on this thread, that you need to edit and close this thread once i have proved that exploit works perfect on all compatible systems.

If you do not respond to me within 24 hour, there will be no support and all future updates will be cancelled as well. Good Luck ?

If you do so you are also one big scammer.

FAT ASS LAIR That's what you are, you are nothing really you are a waste of space on this earth go shut the Fk up!

The biggest shame is you didnt contacted me for a solution :).

Why dont you just put your money in Escrow (Minimalist, HF Staff) and i am ready to prove myself and deliver you service and once you satisfy just release funds.

I am a Legit seller and doing trusted business from so many years, i am not afraid to prove myself.

OP is just creating drama even though i sent him so many messages and solution for this but he just want to create drama and nothing else.

Anyone who is willing to purchase can put money in Escrow to Minimalist and i am ready to prove and deliver service ?

I will advise you OP to kill any hope you have for that refund, because this THEO WILL NOT do that

I chatted with him privately on Skype....(really wanted to purchase the exploit) advising him to do the right thing which would be to refund you back, that is what honest sellers would do. Raymond Reddington and 3xplr3 has done that with me, and I can say I trust those guys a 100%

Theo got aggressive and accused me of being a MULTI!!!! LMAO!!!!Or being your friend....just because I asked him to do the right thing

My opinion for potential buyers is to stay clear of him. He will collect your money, and if product doesn't work, blame it on you or tell accuse you of not reading his ToS but will NEVER refund

But again....just my harmless opinion

Tsukiri - October 1, 2017, 7:25 am

I always thought that this Theo-guy was sketchy. He once offered someone I know a cracked version of Kronos for 2k USD.

Asking him where he got that or where my friend could check the sales thread, he was being all sketchy telling he got it from some

underground private forum or whatever.. I've evaded this guy since I heard about that from my mate.

As far as this goes, CVE 2017 0199 is an exploit dating back a couple of months, and if he managed to reFUD it, props to him.

However, this exploit has never worked for office 2017. If he indicated so, then he gave you a false product description. Any CVE

database will give you a list with affected products, and Office 2017 is never included since it simply isn't vulnerable to this exploit.

If he still gave you the impression that it is, then he sold you a product which doesn't function as advertised and should simply refund you.

If he does not refund you (which probably will be the case), then it is just a blatant scam. This guy seems to be the sneaky kind of scammer

who scams people in a manner that he can get away with it, however it seems that anyone commenting here who has dealt with him before knows what kind of rat he is.

I am sorry for your loss OP, if the exploit he gave you is FUD, then I am sure you will be able to get some hits with it though.

That bastard should be banned nonetheless.

Good luck!

SIM-3386134 - October 1, 2017, 7:25 am

The fact Theo steals other peoples work (botnets) then re-sells them with setup including a crypt which was most likely produced from a crypter on this forum that does not allow reselling probably goes to show hes not a trustworthy individual to deal with.

The fact hes playing that nice guy act, "oh, mine england no too good im only doing good business" when hes selling damn botnet setups... Guys cringe, sorry for your loss anyhow, stay the fuck away from this dude people.

- Theo clearly stated in a PM it was working for all versions.

- OP asked him if it worked for 2017, Theo replied then deleted the messages right after that question.

You have clearly removed them messages manipulatively, and concocted some story about how it was "private information", think about it.. Why the fuck would OP start asking about payment information if you had no answered his question about the 2017 exploit to his liking? Nice cover up,

which makes you even more guilty.

Absolute scumbag.

Exactly what you just said.

Selling cracked botnets (which are useless, anyway) which he probably didn't even crack himself... It's cringeworthy honestly.

Anyone looking to get a botnet.. Don't get a cracked one, you're wasting your time and when dealing with money, even your money (since people charge money for cracked public botnets, lmao).

Just one question, scammer wont get banned on HF? I saw that

Deal Disputes Important Rules

1. HF will not be held responsible for deals made by members. All deals at your own risk.
2. No posting of private data in text form. Screenshots related to deals allowed (paypal, PMs) only.
3. Do not contact staff about a deal dispute.
4. Any reputation you leave calling someone a scammer requires you to link to a deal dispute you've created.
5. Deal must have originated on HF and be tied to an HF member with a thread or PM.
6. Read [Help Docs](#) and stickies for additional information.
7. Upgraded members can also add an entry into the Deal Dispute Database.

Exactly!!!

The annoying thing finally taking shape in my head is the fact that he arrogantly boasts of having thousands of satisfied customers!!!!

Who exactly Theo are these thousands of customers you keep referring to? Where are they? On Hackforums or some Underground Forums?

Because your sales thread you have despite being opened for a while doesn't even have enough comments on them. So that makes you a liar for sure....which is the first trait a scammer always use to scam

You are such a liar dude, i am pasting all skype conversation between you and me now to show everyone.

Here is few more information that i'll like to provide to all other members to Judge:

- OP has some friends on HF and they are adding me on skype.
- They ask me to provide proof that the product exploit works.
- I am ready to prove, i tell them to put their Money in Middleman ' Minimalist ' account in ESCROW.
- Then they tell me on skype that they do not have enough BTC yet, and they will contact me once they have BTC.
- But the real reason why they add me is they are just looking to waste my time on Skype and Lie about it to everyone.
- This member: <https://hackforums.net/member.php?action=profile&uid=2847841> is multi account of OP.

Example:

This very member (in quote), contacted me on skype and we were having conversation about it from almost a week that he wants to buy exploit. Then when this thread came, i just told him to put his money in Escrow and i am ready to prove everything Live on Team viewer !

- This very member is Multiple account of OP, and he has many other accounts here which he is using to create drama on HF.

- Here is Skype CHAT Proof :

[Spoiler]

- 1.
2. I agreed to provide proof

3.

The quoted member told me that he doesn't have enough BTC and will come back when he has enough BTC. After agreeing on all facts, why this member is creating such comment on this Thread? He is still creating such comments because he is multiple account of OP.

Now i am leaving it to everyone to judge what is going on.

The most important point it:

- User did full research from sale thread, and i never said anywhere that exploit is functional on Office 2017.
- User also threatened me that he will Leak exploit (which i am going to report to HF Staff, so they could take action for leaking product).
- User is lying about everything and is just looking for free stuff by asking refund.
- User has many multiple accounts on HF including this quoted member, and is just creating drama.

I want everyone to be fair and judge this without being partial and look for both side. I have never lied about my product to anyone. I have done deal with thousands of member on HF and all positive feedback. .

Thank you ?
