Just go to youtube type - Razor crypter you will see the test crypters and real scan that's showing %100 fud

(Sep 27, 2017 05:56 PM)Buildoman Wrote: [\[CITE\]](#) "Let the other get :D"

What does that even mean?

This is for scammers who try to sell %100 Fud crypters but when you get them it's not %100 fud and functions doesn't work :D

Same, look at his rep? Scanning on VT?! LOL, I dont think this is the real deal thb. Well I'll give him a chance but just saying, also OP you did not post any links.

Also one good hint I could give you is not to post it public. Why? Its gonne get detections as soon as you post it. You gonna need to update it daily if you even wanne have it somewhere fud, better make it a paid program and make some money of it at the end if your putting time and effort into it.

Well anyway goodluck OP.

I would rather ask here...

Let's start with:

What is this coded in?

Does it support .net/native or both?

What features does it have?

Post a scan result link?

That makes absolutely 0 sense.

How do you use your brain?

If I see that you are trusted I send you in Pm if this version get detected and I don't send you next time and send to other which is trusted ones ?

Also go google search for free cracked crypters don't write here and say it's scam :D
You won't get it bye

Yup I got you, total bullshit here, want to offer a free product but isn't willing to reveal any features or any info about it at all.

Willing to bet it's infected.

First of all, I work with some crypters daily and out of working with some programs for the past 3 years, IK that none of the good working legit programs free are. People simply put too much time in the dev of the crypter itself.

Second of all; I don't search for "cracked" crypter since that is complete nonsense, I can simply crack one never release it and change some of the code and call it mine. But that would not prove anything.

Third; you slack information, like .net or native
What features it has for example, simple things...

Goodluck with your program, also I suggest tell the truth on HF people find out soon or later anyway. Hope it's all legit.

Was thinking the same the 100% fud part is maybe right after all aha

DeadKube - September 27, 2017, 6:20 pm

Hold on a second. Wasn't razor crypter coded in AutoIT?

I don't really give a shit if I got it or not, I have no use for it, I was trying to help you but you went full retard on your first day.... never go full retard!

T3KSiGaRa - September 27, 2017, 6:21 pm

We got YouTube video we have so many proofs and you asking some next level questions So you trying to act like smart ? For what

Next level questions?

I'm not asking you to crack the secrets of the universe using MS-DOS and then explain it to me in straight binary code.

I asked what type of files it supported and what features it had?

(Sep 27, 2017 06:21 PM)T3KSiGaRa Wrote: [\[CITE\]](#) We got YouTube video we have so many proofs and you asking some next level questions So you trying to act like smart ? For what

Since you are promoting a program? Go look at any other crypter thats been sold here, or even some of the legit free ones. Take a quick example there, stop acting dumb people will only ask more questions since they see something thats does not sound right, also wanne knew why people act "smart" since they dont wanne handle with bullshit like backdoors/leeches.

DeadKube - September 27, 2017, 6:27 pm

T3 what about my AutoIT question can you please answer whether or not this was made with autoit?
