Looks like a legit service but did you guys make up those backstories?

They sound really cliché and corny haha.

I mean you claim to get into SE by starting to dox your school friends but doesn't the school have a record of every student?

Also your friends would probably have invited you over to their house at some point if you were that young.

Other than the backstories It looks like a pretty professional service and thread design.
GLWS!

All little kids with very limited knowledge on the subject of doxing. None of the age of 16. Wannabe "hackers" pretending to fit into a scene where they're not wanted.

-rep? sales trashing is discriminated here when these are newly created discorda while you have no encounter on who these people are. We do not call ourselves hackers but more of a investigator. I have finished 9 doxes via just HackForums. I do this as a part time job and do not need you sales trashing.

For the rest of you guys, I have received 7 PM's for this service but I will not be on till Monday. I will lower the top two packages and start a sale.

I am sincerely sorry for the inconvienece and I hope you have a good day.

In case anyone is interested in buying I bought the Advanced package and most of the info OP was able to find about my target, I already had. Nothing against OP or his service just giving my two cents.
