Thread: [DEAL DISPUTE - 240\\$ Theo™ UID=3195425](#)

tesla-hobbit - September 28, 2017, 7:58 am

Unfortunately had a deal with this user 2017/09/21 for 240\$ in total.

He didn't tell true about his services, and in result I haven't got what he promised in his thread.

<https://hackforums.net/showthread.php?tid=5600365>

Please read and poll honestly as you think.

Sorry for too much text, I've tried to get in details. So...

Many people vouched for Theo, and I decided to try his services.

Although I can setup botnet on my own, I didn't have worked botnet builder at that time.

My best bet was Zyklon HTTP, and since it's author is not appear on HF for a while, I started to search where can I find working version.

I contacted Theo thru skype, he responded very fast. He answered me for all questions, and soon I decided to buy one bin copy of botnet from him.

He suggested me L*ki for 200\$, but I asked him for Zyklon. He promised me it is fully working cracked version.

So I paid him 70\$ for bin and panel for TOR version of Zyklon.

I created server with only ssh access, hidden services configured and all server with database was ready for panel installation.

Theo has installed a panel, I've logged into panel, executed binary on few test windows machines which he generated for me... and.... Voila - bot has connected.

But as I told, most of the cracked Zyklon's builders has very poor features working, so I've started to test all options that are exist at panel tasks.

And what do you think ? Tasks don't work AT ALL! Although bot is connected.

I've notified Theo about that, and asked him to look at it. He ignored me.

Instead he suggested L*ki for additional money(he promised to make me 30\$ discount and to pay 170\$ instead of 200\$ as long as zyklon is not working ha ha). I asked him to return my money for Zyklon to buy L*ki instead, since it doesn't work, and he just replied me:

Quote:[9/21/17, 22:35:04] Theo [Mentoring Hackers]: Sorry can't do that bro :/

Zyklon setup was your demand that i fulfilled

[9/21/17, 22:35:10] Theo [Mentoring Hackers]: Loki is what i recommend,

How do you think, is it fairly to do so ? Why do you selling non working botnets, Theo ? If your botnet which you have sold to your customer isn't work then please return money! You ignored me instead.

Ok, anyway I continued a deal with him about L*ki which he recommended me.

He told me that if I don't have bullet proof server, he can setup me L*ki botnet on server with domain. I paid him for it, and he started to setup.

Lastly, he told that I will receive only FTP access. What? ?! You told me it's a private server! If you selling botnet, you should handover server with root SSH access to customer! Otherwise you will not be sure when your botnet will be stolen after too much hard work done !!!

Also, user is very unprofessional. Selling things from the internet, but doesn't know how to deal with

server without cpanel. Am I right, Theo ?

All conversation from Skype and server's log I can add so you could see how was things going.

P.S. If some of Uber members would like to review Zyklon installation from this seller, I could provide a full access to .onion panel which he installed me and a bin file. This shit is connecting, but doesn't work at all(except formgrabber).

P.P.S. Found the working free loader in public access and configured on own server.

240\$ in total for non working zyklon bin and loki on a hosting without admin access. GLWS Theo ?

Some proves that I had deal with him:

I'm not the one for whom 240\$ is a too much amount, but my thread probably will help other members that got scammed by him.

He probably can not return money, but he should kill himself for lie. Such users as him making HF Marketplace very untrusted place for deals. A pity...

Boolean type - September 28, 2017, 9:25 am

Sory for your lost OP, Theo is just a liar.

Cracked zyklon is not working, its confirmed by several members, bot will connect to the panel but thats all, everything else is broken.

J?cob - September 28, 2017, 11:30 am

I paid him for cracked plasma because I could not find the builder, The botnet looses bots after 10 minutes. I am 100% sure its an issue with the botnet itself because I ran it on multiple RDP's. I don't want to point any fingers but I am almost sure most of the vouches on his thread are fake. every good review raves on how he is fast to reply and fast setups. This is not the case 24 hours to setup the botnet is expected, he's had to resetup my net 3 times and will have to reset it up once more again. Im thinking of opening a deal dispute too. Its unacceptable.

SIM-82498 - September 28, 2017, 12:42 pm

LMFAO oh Theo.. I always smh when I see people use his rip-off of a service. Since you've provided your own server, there was no need to go to Theo. You coulda just asked in the botnet section if anyone could point you in the right direction towards finding a builder opposed to paying him \$70 to be treated like shit.

Open your dispute, even if you won't receive your money you will help to kick down his "super service providing" account and save people from this fucker. So they could spent money on something useful instead of his superior shit.

Yeah me also stupid? But I searched for bots content with specific features too long time, and was just loosing time, therefore decided to try "superior vouched service". Looks like I just got wiser.?

Theo™ - September 28, 2017, 6:20 pm

Information to all other members:

- OP Contacted me for zyklon .
- I clearly told him that i am not the owner and zyklon that you want is not good for you.
- OP Insisted to buy only zyklon.
- I clearly told him that the setup i have is old version of Zyklon.
- OP Still wanted to make purchase, even when i recommended him to buy other botnets.
- OP Made purchase of TOR version of Zyklon and i did what he asked.

Now everyone tell me where was i wrong ? :) ?

Also OP kept threatening me on skype, and i can provide all skype conversation proof to anyone who wants it.

Thank you.

You haven't dissuaded me too much from buying zyklon, don't lie even yourself. You have

proposed once. And after I have bought your zyklon and told it doesn't work, you proposed me L*ki instead. I also have our full conversation.

As a seller, you should test your product and make sure it's fully working. If it's non working, you shouldn't sell this shit. Even if you didn't know it's not working, you could check it when I reported you about this. You didn't do that.

huongviet - October 1, 2017, 7:49 am

It is very clear this guy is on a scamming spree!!!

I have seen about 4 scam reports on this guy just within a week!!!! I am so glad I did not pay him for the silent exploit. He was really pressuring me to buy

I am now sure he is a scammer!!! If Theo was real, and not a low life scumbag, he would have refunded at least one of his customer but this guy is always claiming he is right and victims who pays are wrong. Really Theo??? You should be kicked out of this community

Here is a user he scammed for \$900 <https://hackforums.net/showthread.php?tid=5726048>

Theo you are a scammer, but well, it's just my opinion

Did you told him that the TASKS on Zyklon won't work at all? No..... SCAMMER hahaha

DamienVC - October 8, 2018, 1:25 pm

Guy is back and active again as he recovered 2FA to scam from his acc again. Deal with caution, better if you dont deal at all. He's a ripper.
