Same here, it's the union method that causes the redirect for what I know

By false statement we mean boolean logic, so you'd have to write an expression that returns false as a result.

Maxpnl - September 30, 2017, 5:27 am

I tried adding a 1>1 after the id but it still redirects me to the index page when I use the union method...

SubZero1992 - September 30, 2017, 6:06 am

thx for challenge your are best injector

????

I told already he is multi account:
pishicat_injector=BlackRose=InjectorBoy ?

As InjectorBoy he asked questions by PM, later as pishicat_injector he posted "private" methods ?

Book from BlackRose has more text from others then from himself ? Without giving credits of course...

Good work pishicat_injector/BlackRose/InjectorBoy ? You must have hard problem to remember in which personality you are at the moment...

yeah ! i'm sure too : pishicat_injector=BlackRose=InjectorBoy

but don't pay attention !!!

we should let him to improve himself !
when improved , he can understand that valuable
methods never should be public !!!

be a master , master janus ?
and help he or anothers when they want ...

this is just offer !

Hi ?

all dios I use is belong to GHI team and we have 30 dios Published By BlackRose in the team's secret FB Group

So Myby I use wrong Dios By BlackRose Name, as you know or Not he have many main Name as BlackRose and InjectorBoy ,but this last name He stopped to using it since some one in his Student asked him to use it from A few years, sure you know this member injectorboy he member here in HF

I think I send to you this query in private message ? so why you ask me that in public, and Why do not you ask me that in private as I send it to you ?, Do not know that this is bad behavior ?

I have wasted my precious time by answering you here , SO I added you in my ignore list ?

Regards

same as this target was challenge in our forum..

so I'm sure this solver "PISHICAT_INJECTOR" FINDED SOLUTION fortunly !!!!

solution never refer to some true false statment ...you use some character and after using once
other it cant bypass..

there are 2000 solution for this...
very very more methods ..

so i'm trying to distract his challenges ..
put 5597 into column 2 and try to use routed query

Well he isnt master, but he isnt bad injector, that is a fact.

pishicat Wrote:i said that many people know that
Well brother, also many people dont know that, me including

If you are mad because he share something that is 'private' then you shouldnt share it to him, and
others who you teached, at the first place, because as you said, its hard work and its a shame to
share it. If he wants to share, he can share, that is his thing.

I mean i dont care, but stop with fighting, all threads are full of fighting, this is sqli section, not
fighting section, god damn it!!

PS: Nothing personal, i respect you.

he to insult always to ashiyane and me...

this methodes doesn't have value to be angry..sharing is not important .
i'm angry for insult me ..

Just ignore him, he is emotionally disturbed child, dont give him attention, thats what i learned in past few days..

For him its all about reputation and attention :)

No offense phisicat_injector but i guess you just need to learn to behave.
