Thread: [Is it possible to Execute a .Bat File and make the CMD prompt NOT visible?](#)

AceVoid - September 28, 2017, 12:50 pm

Is it possible to Execute a .Bat File and make the CMD prompt NOT visible?

Mr. Robot - September 28, 2017, 12:52 pm

Yes sure. You can do this many ways. What's this for?

AceVoid - September 28, 2017, 1:05 pm

I want execute a "Clear Browser History" for my clients. Having the cmd prompt not show will look and act more professional.

Could you explain how Mr. Robot!

Thank you mate!

Phlox - September 28, 2017, 1:19 pm

Please copy and paste below codes to notepad and save it as SilentMode.vbs.

```
Code Set WshShell = CreateObject("WScript.Shell")
```

```
cmds=WshShell.RUN("BatchScriptHere", 0, True)
```

```
Set WshShell = Nothing
```

Replace BatchScriptHere with your batch script name and folder path to your batch script.

For example i have a batch script named RegBackup.bat which is store in C:\Registry_Backups\Scripts folder path.

```
Code Set WshShell = CreateObject("WScript.Shell")
```

```
cmds=WshShell.RUN("C:\Registry_Backups\Scripts\RegBackup.bat", 0, True)
```

```
Set WshShell = Nothing
```
