It's pre rough, I originally just made the beat and then decided to throw on vocals. Lemme know what you think

Pretty unique and the beat really thumps. I'm digging it, but not something I'd personally listen to. I was actually debating pitching his voice, but left it as the original. Though now listening to my remix, I think I could do a few more things to spice mine up a bit more.

Also, I just uploaded an updated version of my old Heartbeat remix.
