Thread: [I was infect with virus by mehtevs uid=3206518](#)

volkrof - September 29, 2017, 12:09 am

Hello

This may be the last post I might make here on HF..i join this community to find somethings to buy like crypter and exploit I have been ripped so many time but the thing about HF is there a lot of fake seller and fake vouch when someone in the group of HF-UB3R post something to sell a lot of them will vouch and make fake report so that the person my sell for example

I meant mehtevs him selling macro exploit and we make trade of him given me the codes and refuding for me which I thought him how to get use my smtp scanner and teach him how to get a lot of smtp which he later start selling here on HF but to my surprise he stop talking to me and I keep buzzing him that I need refud but he said he does not want to talk to friendly people

Before I join HF I meant another guy name

Pharmacist

Who coded mass sms sender for me which I paid him 300\$ btc for but I did not know virus was put in the sms sender I notice that anytime I want to send out btc the btc address will change to another the I accuse him we fight over this and I deleted him but getting to know his friend to the other guy I know I might be in trouble to cut the long story shot last night b4 I went to bed I notice someone was using my skype and try to sign him my discord from IP

IP Address: [deleted]

Location: [deleted]

But they got in to my skype, ask my contact for btc and delete some of my contact I did not know who did it but mehtevs contact me on discord and send me pics of my conversation with one of my contact saying I was leeching his code then I knew he was the one that infect me with virus which I did not know how

He send me the picture of conversation of one of my contact

Him chatting with one of my contact on skype

Picture below

[img]<https://i.imgur.com/EAXl8D0.png>[/img]

So he might claim he did not infect me with virus cuz Is not allowed on HF but PLEASE MY QUESTION IS

HOW DID HE GET MY PRIV8 CHAT WITH SOMEONE ON MY SKYPE

HE COMFRIM TO ME THAT HE WAS THE ONE B4 HE DELETED HIS CHAT ON DISCORD

Mehtevs you might be powerful on HF but one day u will get your part of the Karma

This not the right place to post this I know.. but I cant post at the market place cuz I was given a

negative rep but all the same I need to let people know and am sorry about this people are pure evil cuz they know i wont be able to make report with a neg rep thanks

mehtevs - September 29, 2017, 1:52 am

yo man one of your images isnt working.

SIM-2223238 - September 29, 2017, 10:02 am

he could've breached one of your passwords trough db lookups, aint rocket science.

Splinter - September 29, 2017, 6:48 pm

Well it all started after he bought a site that was backdoor worst the the french maid who's been doing her rounds for 10 years. People did take the time to warn him he ignored them... So my bet is password was reused from the "admin panel". But he will blame anyone under the sun for it, it's a sad story but he ignored the warning after he was also told people left on very bad terms.

volkrof - September 29, 2017, 10:59 pm

i have no need to defend myself ?

people can judge from what they read here.

also

"btc hungry" and getting low balled is something different.

Universe_X - October 2, 2017, 3:41 pm

indeed that's quit unfortunate op

volkrof - October 3, 2017, 2:12 am

As you all can see all my proof pictures has been taken down that to show you before someone can go to the lent of reporting a picture link now who the lair and i thought infecting infecting fellow member on HF is not accepted

Splinter - October 3, 2017, 7:34 am

@Ejire,

Can you please stop putting salt down now, it's looking more and more like this story is all made up. I don't know about you or others but if the links are being removed it's because you are usually not showing any proof. I would find it odd that staff would go around trimming evidence if there was any. starting to sound like you may have made most of it up to see how much pity you can stir up and try to make yourself look legit.

I don't know you well enough but seeing as i caught you changing users passwords on your "new" site the you bought. To login and see what the user was having as a private conversation with other members. That's just fucked up, and a truthful an honest guy tell the people that you did not do that I was with the victim(s) while you did that.

Further more when you accused people in my entourage of hacking you I asked you for a shred of proof. here is what i got, well after using a tool you suspected infected you deleted it or so you claim.

Before that you said well the tools don't work it's funny since I have used the tools that were sent to you as an independent tester. There was nothing on them, they worked as they were designed. Limitations were stated to you and you ignored them.

Then you go on peoples channels start disrespecting staff and higher ranked members people who have been in the game much longer then you have by a minimum factor of 2 to 3 times. You went so far as name calling and accusing, then you are surprised that they actually stood there ground.

I want to make this clear so you have an understanding of how annoying this whole thread is and how personally at this point I think HF Staff should look into banning you.

- The members you have accused have been staff on not one not two well known boards but 5+ boards.

- They all started in the scene did there time, worked and collaborated on projects (which made the

scene before people like you came along and destroyed it.).

- Most of the members have developed not one not two but hand fulls of products, were backed by staff and members on this boards and other a like.

So before you keep running your mouth and say "I was hacked, They did it" because I took the time to speak with some of the people you claimed said they hacked you that I knew. You should really know one thing DON'T FUCK WITH PEOPLE who know more than you, have years of experience on you, and have habits of being dick trolls when you accuse them with no proof.

Because you will get people like SexCatGirl who will say "Ya I hacked you <enter reason here>" simply because you want it so bad to be them. I mean come one even the old timers that were looking from the side lines were like "What a fucking moron Ejire is". and for the people reading this thread I'm sure this is more or less going the same way.

I can tell you with 99% certainty how you got hacked because all noobs like you do it an it's bad practice and the old timers are fed-up of saying the same goddam thing. Was/is your password "[deleted]" it took me a whole 5 mins to find it online link to your name and 3 different email addresses. I didn't bother with the hashes, plain text is faster. if I'm able with google to find this what do you think 100+yrs of collective experience would have on you?

The members of this community have a right to know that you probably got hacked by someone if at all true and you were not trying to rip off people and that's with some kind of scam. But if your gonna make a case for yourself make sure it's a good one, because when you make claims to peoples reputation and they don't hold up you are asking for retaliation the fact that you are here today is a statement to the integrity of the members to live by the code of not attacking fellow members.

I want this to be on record that if you keep this up, I will not be the one to say to them you know guys give him a chance he's foolish and does not know better. You may wake up one day and all your crypto currency slush funds are gone, any banking details you stole from people will be given to the feds, the connections to your bot severed, and so on.

bottom line to this whole debacle is you are a noob, you swung your dick out in peoples faces and someone kicked that sorry excuse of a dick back in it's place. To the people who did this if you are here I thank you for giving Ejire a life lesson to which maybe one day he will learn. Ejire on this note I hope you learned something from this post, if you think your the only one this has happen to you are wrong at one point or another someone else who know has far superior skills that you may have been in your shoes.

The difference will be that the skilled individual is one who learned his mistake and fixed it. As it stands I don't think you have the mental capacity at this time to understand this so to you I tip my hat and walk away from your stupidity. Go move on and continue being a 419 criminal, your good at it so why not continue. I can make these claims I have done my time and for the people who know me they don't question my integrity. I don't have the time to make up stories to make drama or stir it up.

volkrof - October 3, 2017, 8:26 am

Ohh @Splinter im i a 419 criminal? let me ask you this

have you not work with 419 before
have you not ask for money for this 419 before
your friend code sms sender for me which i paid them 300\$

i gave Pharmacist money to travel from Russia to Germany you did not know all this do you do you

know i have paid Pharmacist over 300\$btc to make a banking checker for me which did but did not work but i did not ask for refund now what bring this fight btw me and your friend after i ask Pharmacist to come to my desktop for proof of fund he ask me how do i get this kind of btc Pharmacist ogun kill him if he denied it you this broke idiot coder looking for someone to just steal from when your foolish friend saw my btc account and i paid them 300\$ mind you this over 1 yr ago not on HF anything time i try to send btc to another person my btc address always change to spare me with all you bullshit 419 shit cuz your friend and including you have ask this 419 before an i even bought your forum from your broke ass idiot admin called Envision i paid a lil money cuz he was hungry told me he need money for project so this 419 has feed many of you before ... you guys will be clamming innocent like why the fuck will you code for me or sell for me if you now a 419 your self stupid fool

now about the idiot called mehtevras i did not know him through you i meant him here on HF we chat on Skype we trade he was the one that told me you guys ask me got my pass and good u even paste it here this to show people that you Splinter Pharmacist and mehtevras can not be trusted did i do you wrong no did i own you money no cuz i paid your friend

proof

About proof i cant proof anything cuz you stupid ass fool can see even my pics was reported and taken down and on discord he deleted all his chat so am not stupid
about ur saying i log in to ANimal account what is the diff between us ... you guys hack my DB login to my Skype ask my contact for btc ..that you sell macro builder (mehtevras)
now dont bring all this bullshit here

Question ...why will mehtevras report my pics

you guy can even hold on to a single forum remember you told me your self that Evins0n is a ripper that he lost 2 admin before you
did you know is was Pharmacist and AniMal that told me to show them proof payment when they code the sms sender that i should not send the btc to u... that i should send it to them

do you know they have done like 3 project for me the only clean project i have from them is th THUr URI encoder which i paid this HE Goat ANimal 70\$btc for

i know one day you guys will get what is coming for you

and do you know i gave Pharmacist money to code for me full time and stop working day job that how broke he his this fight started when the btc stealer did not work

and did you know after i got hacked i paid mehtevras 20\$ to tell me how which he told me everything but deleted it on discord

Idiot days ago u were willing to work and sell for this 419

THIS is was the email you send to all old user of the forum your website is there too foolish man

this what you told me about Evinsi0n that i bought the forum from

you knew your friend/admin is a ripper stupid bunch of he goat

tommy198013 - October 3, 2017, 9:15 am

@EJIRE dont mind this low life shit guys that how they go about infecting HF members please my fellow HF member becareful dont deal with this guys they will infect you

stolencertificate - October 3, 2017, 9:56 am

i am not trying to side any party but what i do know is that someone hacked the forum and i was one of the people asked to transfer some bitcoin to a suspicious address but i verify from ejire jabber and he told me the message was not from him(the btc request on skype). i doubt all these allegations made by splinter because you still want to deal with ejire that you called a 419.dam! no more trust !

Splinter - October 3, 2017, 10:31 am

Oh Ejire,

You ran up a bill I ain't getting into this, as people don't need to know my business.

Ejire I don't really give 2 fucks who your are regardless 419 or not money is money and that at the end of the day is what I care for. So again if you want the kit it's yours the terms are in the chat as stated before. screen shot above state it. So PM me my terms have not changed, I will give you an encrypted package and once the BTC clear I give you the password take it of leave it. As for Rhyliv the vuln is still in existence you did not provide proof the price if 16K\$ for the patch in payment done in USD funds. If you want it's your to have if not not my problem.

Envisi0n's dealing are his own and he can attest for his actions since I am not he and he is not a staff or part to my team and partners I don't see how his managing Rhyliv is relevant. My job was to maintain the site to a functional method and protect it to the best of my abilities. Security measures were taken to protect the community you bought the site the config on what the server was doing were not given to you and thus you did not get the methods to protect the site.

I don't bring thing anywhere you did all this you brought up yourself you started this thread you made claims. you failed to prove anything and the staff decided to look at complaints in the screen shots and opted to agree with the person making the complaints.

We don't try to hold up forums. My team and partners don't need a forum to communicate help people. My team moved on to new project like many people have done most of the forums that they are no longer staff for are still running. So holding them together is a very odd statement, also you would have to know who "they" are. Which you don't but thats because you are ill informed.

(Oct 3, 2017 08:26 AM)EJIRE Wrote: [\[CITE\]](#) THIS is was the email you send to all old user of the forum your website is there too foolish man

How did i do this, go you have the floor. are you saying that the password I found writing the previous post was the password? because if that's your proof man you need help. Stop putting slat down, understand were you went wrong. I have offered you help time and time again. Yet every time people shit on you some how it someone else fault, you never do anything wrong. I have dealt with people time and time again, if i learned some time ago people don't shit on you the way you are claiming if you did nothing wrong.

The fact I was forced to start pulling the cloak off and show I'm an old timer rather than a noob to

stop low life that have infected what was a scene.

So how did he and I "do it"? cuz last i checked you have zero proof. Tell me how did we do it Ejire. Make it public how you got hacked so people know how you probably failed at security 101. I would tell you to pick up a book and start reading but really they teach this shit in school, they have been for the past 15 years at least. So if you missed that memo in your life time I don't think your gonna get it from a book.

as for your claims he infected me SHOW THE F@#\$ing PROOF. It take anyone with basic skill 5 minutes to put proof together that can't be argued even by staff. None of the stuff you say has a backing beside the I offered to help you if proof was given and at fee if none. And offered to sell you code that i have in my research bank that i have no need for at a cost as I believe in capitalism.

I would file a complaint to staff that your claim has no validity and that you are trying to smear a rep for a user without a shred of proof. you keep saying they deleted it what kind of f@#\$up does not keep a copy of any convo? Well 2 camps the one who know you will be making private dealing public. and the morons who don't keep proof when they know they will need it to have a leg to stand on.

Just notice I was green seems i have a fan... Ejire why you getting me a membership? jokes I don't think it's Ejire I will have to go find out. I hope that you pick up on some of the knowledge I have given you again in this post.

But seriously Ejire, you made it a war with people who you don't know. You accused people of doing things that you can't prove did or did not happen. You claim that I sent out an email but the only admin is you and I was not at my machine at the time of incident. You claim to have no skills and only buy stuff i'm gonna guess rely soly on an av to detect things going on your pc.

---did not see post above at time of writting post---

Ejire look we have someone backing your claim. So now we have proof you were hacked.

@stolencertificate capitalism does not discriminate 419 or not I have thing and for the right price I will move it. As for the helping him for free after calling him a 419 well there you go you see how honest I am the offer is still on the table. It will never change I do the work and sell the products for what they are who and how it's used i don't care at that point.

Men leave all this story 15 yrs who gives a shit i said he infect me not you i did not know this idiot (mehtevas) through you why are you defending him
did i mansion your name NO

did you forget he got into my system and ask for btc

i think you are the one that has the big mouth that you can defend him or he paid you a lil btc that you now carry the cross that is not yours .

why did your friend gang rep me before i can make a thread why
why did your friend deleted our chat on discord
why did your friend report my picture above for proof
why did he report it

now after calling 419 you dont care now money is money men go fuck your self my thread is about EJIRE and mehtevas that we trade and he infect me

Splinter get a life let the moron talk for him self

you that you claim to be helping me did you forget i ban you and you sign up with 4 diff ID like i wont know ? and you made you self admin and you send out that messenger cuz you still have access to the admin login

Splinter the user you guys were asking btc from has make his own comment too bitch move

Even in the neg rep your friends gave me they said i lick a private software
did i send the software to someone on Skype? YES

and the only person i send it too you guy dont know ,, or anyone on my contact

how did he know i gave someone the code if not he has access to my pc or Skype

they all said it in the rep they gave me after hacking

how did he know i send it to someone on Skype REPORTING MY MY PICTURE IS SHADY

Splinter - October 3, 2017, 11:28 am

See you still on and yet off topic I made these replies based on your claims/statments. Beside one person here you have no proof it was him. And the one person backing you has only been able to confirm you got hacked. So were is the proof he infected you? I keep asking you the same question over and over and the answer is still the same no proof none. but you are trying to hurt his rep.

I wish there was a way to insert a chant here. and it would go like this "We Want Proof" which you were not able to do.

I will give you a easy way of looking at it Ejire I have 6000BTC in my account.

Then you say prove it then I say well your friend is a dick and he <add more stupid statments here> thus I can't show you the 6000BTC but I have it.

Then you say well F@#\$ Splinter your a dumb f@#\$ I want the proof you have the 6000BTC.
I say well the subject is not about me and you it's me claiming I have the 6000BTC.

do you see were the logic fails that is what you did.

you went accused someone.

then someone (me) asked proof.

you <enter stupid statment> sprinkle issues not related.

then someone(me) talk to you about your issues.

you <enter stupid statment> sprinkle more issues not related.

then someone(me) talk to you about your issues point out issues.

you <enter stupid statment> sprinkle more issues and wants to be back on topic.

then someone me were is the proof?

you went around the town with all your problems but the question is still there do you have any proof it was him. This proof has to be in a way that no one can say no this could not have been him.

As it stands the answer to this very question is NO.

So say what you want I mean shit there is a book I could write on this I'm sure if I tried. But the one question I have asked now over and over and over to all your claims is is there proof that login notification I can use a proxy and get theses site to sent me. it does not mean you/anyone hacked me all it's stating hey this ip logged in. you could have been on tor/proxy/or vpn.

So i ask again please provide proof that mehtevas actually infected you. Thank god i'm not a staff member on past boards I helped managed people who made claims trying to destroy peoples rep used to get banned and this was also a standard on boards i was not staff on. Its sad to see HF does not do this, if you are gonna make a claim be sure that your claim can be fact checked and that you have enough information to back up your claim.

volkrof - October 3, 2017, 11:51 am

And like i said and i will keep saying

When i chat with him on discord i make i screen shot of what he said about him chatting with someone on my skype and he send me a screenshot

i made all the screen shot and paste it here your friend report it
people like

DelziumTheProudWhale_temp, Pir?myd ,Aggron saw the pictures

where are the pictures now i made a screen shot and yes i try if i can get the picture back no i did not keep a copy cuz i did not know he cant report it and they will be remove by gyazo

and you keep asking for proof the proof i have is to make screen shot and post them here or you want me to make a video why did he delete our chat on discord

Splinter - October 3, 2017, 12:06 pm

No I want f#\$%ing proof you know the one the no one in there right mind would remove.

Dude you have accused me of hacking you here and in chats guess what I now seeing the lengths you will go to to try not to show proof I should have trolled you all the way to the moon and kick your

ass to the sun saying I hacked you, did this and that. then when all my f#\$% ducks are in line I would simply made a fool of you but this is not the F#\$%ing case.

I won't tell you how to do this since to be honest I have spent to much time on this issue. but truth be told you need to learn how to make a f#\$%ing log and gather proof if you are going to be in this world you should know how to log shit. You should have a proper vetting platform and network. because you don't you have no proof and because of that now you are making claims you can't back.

volkrof - October 3, 2017, 1:08 pm

You can ask all you want,

The proof was in this thread before it got deleted.... i have made the thread i want to so... and we will keep going front and back with proof but i keep asking you too fool why did your friend reported my pictures

why did clear his chat with me

why

Splinter - October 3, 2017, 1:25 pm

Ejire,

lets talk about proof

Here is you contacting animal letting him know you access his account...

And we have the log of you talking with him saying you would log in his account.

anyone taking a close look at this will notice animals name in the bad screen shot cut out top left.

and you posting it so the only way for you to do this is logging in as him. Unlike you I have the proof to my claims and your actions.

Pharmacist - October 3, 2017, 1:35 pm

mother fucking, fucking fucker dog fucker EJIRE. Get out of here with this fake shit.

volkrof - October 3, 2017, 1:36 pm

like i said before i return fevour when i got hack yes I login to his account did i chat any of his contact no

and like i said in the picture that you your self posted i ask him if you guys were done with my account

so try to turn this around that you guys did not start all this

did you login to my email yes

did you guys login my Skype yes

did he delete his chat with me yes

did he report my pictures yes

did he try to rip my contact for btc yes

CAN SOMEONE PLS TELL THIS FOOL THAT THIS POST IS FOR THE GUY THAT INFECT ME AND ASK MY CONTACT FOR BTC

What the fuck are you trying to prove? You were either hacked by someone, and it WASN'T mehtevas, or you are trying to get him in trouble because he wouldn't help you because you know absolutely nothing and he wasn't going to spoon feed you?

Splinter - October 3, 2017, 1:45 pm

Ejire,

This leads back to your credibility in your statements and my claims in my statements earlier. So they have everything to do with this post you brought shit up and I will be happy to share with the WORLD! Did I login or my team log into your mail no did we login to your skype no. but meh what do I know I weather if I logged into your shit.

So how did he do this you have no proof NONE, 0, NADA.

LOL it not a shame i can say it anywhere yes i dont know how to code must i know how to code that why this forum is here meet good coders that dose not try to steal buyer money by using btc stealer and u said he was not the one how did he know i share the doc shit he gave me how did he get into my chat and he snap my chat with the person and send it to me
how did he get in to my personal conversation

Did you ever think that maybe he talked with someone you sent the builder to? You admitted to leaking his software. You've even got in your rep that you're leaking software.

LOL i send the builder only to my brother and if so, can you please tell him to make a screen shot of the person and send it to me mind you it was on skype

not discord you people should be ashamed of you self low life fools... meanwhile your friend called me a 419 dont forget it is you that was making all the tools for me

xchng - October 3, 2017, 2:18 pm

Got to love that this is posted under introductions.

Might want to move it to:

Hack Forums / Computing / White Hat Malware, Virus, and Rat Removal Help / Computer Protection and Security Alerts

Mr.Ransom - October 3, 2017, 2:23 pm

To get this right according to OP some of the proof picture has been deleted which everyone can see your claim in him to provide you proof is not point and

why the accuser report the pictures and for what i have read you guys gang up on him i wonder why though i have deal with him many times and we had no issues of payment

volkrof - October 3, 2017, 2:42 pm

part of the pictures you deleted pls guys read the picture with open mind after i accuse him of hacking me that i gave him what he want

the next thing he said was DID I GIVE HIS FRIEND WHAT HE WANT

even call me the N word LOLOL
