MY ANALYSIS- I first want to say before anything, this ICO is more of a crowdfund and not something that should be invested in if you are looking for profits. At its current state it is not really going to explode as they won't really be implementing anything until 2018+. As they build they could however make some advancements that could increase the coin that I could see. I really like the project, I think it is very interesting and just goes to show how far blockchain technology can go. Of course the upside to this is that you could make a profit if the coin actually does go up, but if it doesn't you are supporting sports athletes and if one of them actually makes a long running career you can say you helped him scale his career financially. The whitepaper does make note that you won't be receiving a share of the revenue that is earned "does not grant to token holders any right of claim on Company's financial or any other assets." The idea that a sports athlete can come and apply for funding is really interesting and it will certainly be a hit in the community among sports athletes. I also like the idea that if you are a token holder you can vote on different subjects and based on the number of tokens you have will determine how many votes you get. "Each ACE token holder will have the opportunity to voice his/her opinion within 48 hours after the start of respective voting procedure." This platform has a lot of potential to be used as it will involve a huge community whether you are a token holder or a promoter/player. A good thing to note is that it will not reach an exchange for around a month after the coins are sold, so if you are looking to sell extremely fast this might not be for you.

Voting template : This looks really cool and would be a fun way to stay active in the sporting industry that you enjoy.

Uses : So basically you would buy this coin to get autographs from the player or a video chat with them and you would pay via ACE. I think in the bigger picture they will get into ticket sales and allow you to buy via ACE which would be a cool way to integrate the coins.

WILL I PERSONALLY BE INVESTING?- I will be waiting for the coin to actually release and see how the community reacts to it. I won't be investing for a financial compensation, I would be investing because I like sports and would want to be active in the community of voting athletes in the promotion system.

RATING- 7.5/10

*This rating does not reflect a financial benefit to investing. I am rating the project on its uniqueness and idea on scaling.

Invest at your own discretion. I am not responsible for your investment, I am simply adding my analysis and prediction. I am not a programmer or a coder, I am making my speculation based on my previous business experience and understanding of the market

Good analysis and I concur with your opinions. Not a wise choice for any investors.

shreder - September 29, 2017, 2:59 pm

Biggest issue is without these celebrities or fans you have absolutely nothing. Also is there a way you score it or you just put a number out you think is fair.

What do you mean? When you give the athlete money?
