Thread: [Is Mr.Robot worth watching?](#)

Crypt - September 29, 2017, 6:27 pm

Was thinking about starting the series. Wanted to get some opinions before committing to another TV show though haha.

What do you guys think about it?

Stixx - September 29, 2017, 6:31 pm

I watched the first two episodes, was kinda interesting.

I'd recommend it though

Regulus - September 29, 2017, 6:31 pm

I liked it a lot to be honest.

I'd recommend it.

Fruitcake - September 29, 2017, 6:31 pm

Yes one of my favourite shows tbh.

Char dev is fucking mindblowing

Great story with perfect actors imo.

Emily Brontë - September 29, 2017, 6:32 pm

I recommend it, especially if you are interested in computers or hacking in general. Many of the attacks are authentic and done using real tools, which is refreshing to see given the common precedence set by hacker movies/tv shows.

nicksaban1 - September 29, 2017, 6:32 pm

Fuck yeah it is. But why ask us? Start watching it, because the next season comes out this coming month!!!

Silent Uprising - September 29, 2017, 6:33 pm

Yes watch it. Binge watch it all fast. Season 3 starts in like a week! I'm hella pumped.

ahemokay - September 29, 2017, 6:35 pm

Try it its not bad, i think it got kinda boring sometimes but maybe you will like it more.

Cuthbert - September 29, 2017, 6:35 pm

(Sep 29, 2017 06:32 PM)Emily Brontë Wrote: [\[CITE\]](#) I recommend it, especially if you are interested in computers or hacking in general. Many of the attacks are authentic and done using real tools, which is refreshing to see given the common precedence set by hacker movies/tv shows.

Real hackers don't break into systems, and using other people's tools is regarded as skiddish amongst genuine programming masterminds.

Toph - September 29, 2017, 6:36 pm

The story is pathetic, they reveal rat droppings each episode to drag the show on as long as possible.

Tbh, it's a boring show. Enjoy fillers 90% runtime of each episode.

Emily Brontë - September 29, 2017, 6:38 pm

(Sep 29, 2017 06:35 PM)MrRandom Wrote: [\[CITE\]](#) Real hackers don't break into systems, and using other people's tools is regarded as skiddish amongst genuine programming masterminds.
Forgive me father, for I have sinned

You dont have why to waste time creating whats already been created from others.
Simply use it, doesnt make you skid.

SIM-2875347 - September 29, 2017, 6:42 pm

I thought you were talking about the member and was very confused, dont tell me i was the only one

Death - September 29, 2017, 6:44 pm

Same lol, i thought he was talking about his videos

IMRICH69 - September 29, 2017, 6:44 pm

As a person who just watched it, to watch it. It was good.

Really got into the story. Can relate to some of Elliot's issues, his opinions, etc.

Very cool series imo.

Cuthbert - September 29, 2017, 6:45 pm

The very meaning of a skid is a script kiddy, one that uses other people's scripts.
Ask Linus Torvalds if he agrees with using other people's proprietary software, lol.

Silent Uprising - September 29, 2017, 6:46 pm

(Sep 29, 2017 06:35 PM)MrRandom Wrote: [\[CITE\]](#) Real hackers don't break into systems, and using other people's tools is regarded as skiddish amongst genuine programming masterminds.
Real hackers use other people's tools. Does every pen tester have to create their own tools? No it's pointless and a waste of time. If the tool works why create any other tool that does the exact same thing? Think bout what you said haha.

Being a script kiddie is copying code without any idea what it does. "Real" hackers can use other people's software. Kali is fairly popular OS and comes with a ton of very useful tools, many of which are used in the show as well as the real world.

Death - September 29, 2017, 6:48 pm

Pen tester $\neq$ hacker, by today's definition of the term. Using other people's software with malicious intent is frowned upon by the genuine hacker community. Hackers create, crackers destroy.

Mr. Robot - September 29, 2017, 6:57 pm

(Sep 29, 2017 06:52 PM) MrRandom Wrote: [\[CITE\]](#) Pen tester $\neq$ hacker, by today's definition of the term. Using other people's software with malicious intent is frowned upon by the genuine hacker community. Hackers create, crackers destroy.

No, see clearly you have a fucked up definition of the term hence why Omniscient tried to run "Taking back hacker" to redefine the term.

There are many, many ways to obtain unauthorized access to machines. Just because you think one way is superior, it doesn't make it so.

AS far as calling people who use other people's scripts "Skids" - the general consensus of the word means someone who doesn't know how to program so instead uses other people's tools.

By that, we can agree that if you understand how a tool works and how you would create your own (and you should most of the time for your own collection) there is nothing wrong with not reinventing the wheel.

Top result for "pen tester"

Penetration testing (also called pen testing) is the practice of testing a computer system, network or Web application to find vulnerabilities that an attacker could exploit.

Top result for "hacker"

A person who uses computers to gain unauthorized access to data.

While you want to add your own definition to these words, you can't without fighting it and doing something about it. You can't just claim one word means something else.

Cuthbert - September 29, 2017, 6:58 pm

That's not the same as claiming to be a programming mastermind which you wrongly accused me of. One doesn't have to be a programming mastermind to be aware that using other people's software with malicious intent isn't looked upon with pride amongst the likes of real hackers like Richard Stallman, Linus Torvalds, Dennis Ritchie, etc... which spent the majority of their lives building their own software. The greatest hackers from the legacy system days found it second nature to write their own software, and continue to advocate it as such.

Mr. Robot - September 29, 2017, 7:00 pm

People who make legal software and programs for learning and legal use still fall under the umbrella of hacking.(pen testing).

You can stop bringing Linus into this as if he didn't exist, someone else would have taken his place.

He was just lucky enough to be the first - which i'm not here to discredit, however it's something that was inevitable.

Cuthbert - September 29, 2017, 7:02 pm

Dictionaries are not always right, and I most certainly wouldn't look towards Omni to define the term.

It's not reinventing the wheel if you're writing unique exploits like a professional hacker would.

Mr. Robot - September 29, 2017, 7:04 pm

I have found many people who have come up with the craziest ways out exploiting a site through idea(with 0 coding languages under their belt) and having someone else follow that idea to make those "unique" exploits.

Which one is the hacker in your eyes?

From what we are reading, you are saying the programmer is 100% the hacker.

If that's the case, then we have very different ways of looking at the world.

Cuthbert - September 29, 2017, 7:08 pm

That doesn't make the person a real hacker. You're only a hacker when the genuine community calls you one. And please don't ask me which community that is. Anyway, I'm not here to debate like this is SRPP. Enjoy the show, and believe what you wish, democracy!

Mr. Robot - September 29, 2017, 7:09 pm

You clearly have no idea what hacking is, and never will. Your posts have legit given me cancer and my IQ has decreased dramatically after reading them.

"True doctors don't use equipment made by others lol only a REAL doctor invents their own medicine, equipment and methods" <-- your argument

Cuthbert - September 29, 2017, 7:13 pm

Slight anecdotal fallacy here. Doctors are not hackers, you cannot compare the two. I could say real cooks use their own ingredients, and that works too.

I would love to read your definition of a hacker, or are you too going to paste the non-technological dictionary definition?

Mr. Robot - September 29, 2017, 7:14 pm

"Don't treat this like SRPP"

"Hey you made a fallacious claim!"

Make up your mind. Also, the definition has already been posted so no I won't. I would LOVE to see what qualifies you as a hacker honestly because right now all I'm seeing is smoke billowing out of your gaping ass.

Deany - September 29, 2017, 7:17 pm

fuck ye, tyrell is my home boy.

ZuGgY - September 29, 2017, 7:18 pm

It's ok, definitely not best show I've watched, but ok. It's very overhyped, in my opinion.

Cuthbert - September 29, 2017, 7:18 pm

(Sep 29, 2017 07:14 PM)Mr. Robot Wrote: [\[CITE\]](#) So gives us a real example, because apparently you can't be a chef without using ingredients you grow.

I was never being that rudimentary, and you're being pedantic now. Of course a genuine hacker can use a programming language developed by somebody else, just as a cook can use ingredients grown by somebody else. You must love reading what I have to say if you're forcing me to repeat myself, it is frowned upon to use other people's code with malicious intent, and then call yourself a hacker.

Emily Brontë - September 29, 2017, 7:20 pm

Frowned upon $\neq$ removal of title

If you use 1337h4ckerGod's tool to dump an SQL database of a chosen site, you're a hacker. Are you a very good one? Maybe not. But by definition, you have engaged in hacking and therefore you are a hacker regardless of what some forum lord thinks.

Cuthbert - September 29, 2017, 7:20 pm

Hi there. "Real hacker" here, currently certified by NSA & DoD. Can confirm this is completely inaccurate. Mr. Robot's fought the good fight for me, but just throwing my two cents in here. We've written our own port scanners, written our own versions of NMAP or Golismero, but usually fall back on the established tools. Why? Because it's readily available to us. I participated in a live fire red team exercise, wasting time messing around with our own versions of established tools was a mistake. Second round, we used the real deal, time AND effectiveness benefited.

Edit: On topic, yeah watch the show. ? Loved it, currently have it on my other monitor as I'm writing this.

Revamp - September 29, 2017, 8:58 pm

Yes it is, one of the best shows I've seen.

Mr. Robot - September 29, 2017, 9:01 pm

(Sep 29, 2017 08:54 PM)Shoe Wrote: [\[CITE\]](#) Hi there. "Real hacker" here, currently certified by NSA & DoD. Can confirm this is completely inaccurate. If you can't create the real deal yourself, then you're not truly a hacker. You're just a computer geek as far as I'm concerned using the tools made by genuine hackers. Hacker is one of the most prestigious titles one can achieve in the IT field, so I'm glad you put "real hacker" in quotes.

Lukas - September 29, 2017, 10:01 pm

The first season was very suspenseful and full of action, then the second season got released and it became very boring.

Mr. Robot - September 29, 2017, 10:03 pm

Emily Brontë - September 29, 2017, 10:08 pm

(Sep 29, 2017 10:05 PM)Mr. Robot Wrote: [\[CITE\]](#) I do respect what he's trying to say, I wish the world worked in the way he describes it - but it isn't.

The entire argument he's making is just nonsensical to me. I understand what he's trying to say but as you stated it is not how the world works bc it is unrealistic.

Why spend hours, even days or weeks programming a tool to exploit a vuln you find? You not only risk it being patched, but you lose time which is invaluable. Better to simply utilize pre-made tools to exploit a system. If you know how to use the tools and what they do in the background, that is enough for me to respect your craft.

A skid is some kid running SQLMap on a random gaming website he got banned on. Not just anybody who runs a program someone else made.

FamousHater - September 29, 2017, 10:09 pm

yes watch him right here

(Sep 29, 2017 09:01 PM)Mr. Robot Wrote: [\[CITE\]](#) Hey my boy Shoe, long time. Gonna have to catch up ready for some Doctor Who and Mr. Robot

Hey man. Ya, I'd be down for Mr. Robot talk -- I'm about halfway thru S2 admittedly. Didn't finish the season like I thought I did. Haven't watched Doctor Who, though it's on the list; wrapping up Dexter & Sherlock.

qAzrael - September 30, 2017, 8:00 am

I watched the first season, was really interesting and enjoying to watch. However I started the second season and didn't really feel it there. Would recommend though.

Mazekeen - September 30, 2017, 8:07 am

I like it. Its new and refreshing but the new seasons are kinda booring since main character lost his mind and normal life

vinagron14 - September 30, 2017, 10:00 am

Mr Robot is amazing I highly recommend it. There is some items which closely touch how they work technically (some of the hacks) and its very fun to watch in real world examples!

:)

CYB3RM4N - September 30, 2017, 10:01 am

If you love technology, hacking, computers and such, yes.

It's also very highly rated on IMDB and Rotten Tomatoes.

Chloe Price - September 30, 2017, 10:01 am

Yep, mr robot is a great TV series if you like coding and such.

Season one has to be the best so far.

DeadKube - September 30, 2017, 10:03 am

I don't watch Mr. Robot because I think it's against the rules to RAT another HF member..

Shoe - September 30, 2017, 10:22 am

(Sep 30, 2017 10:03 AM)DeadKube Wrote: [\[CITE\]](#) I don't watch Mr. Robot because I think it's against the rules to RAT another HF member..

That's punny. Gtfo. ? <3

Calogero' - September 30, 2017, 10:23 am

I liked it a lot, would definetely recommend.

SmmMarketing - October 2, 2017, 4:48 am

Mr.Robot is great series but very long for each episode.

It's worth watching but from the second season it was too much Thrilling.

Mike444 - October 8, 2017, 2:32 pm

I have enjoyed watching the first series, but the second wasn't as good as the first one, so I stopped with this TV show

datguy.dev - October 10, 2017, 12:20 am

The series has a lot of the aspects that I found interesting in the first or second season. But like with any series, the story and characters start to degrade in the later seasons.

My only real gripe about Mr. Robot - no spoilers - is they purposefully do something that spans many episodes which is a complete waste of time. Like I'm waiting around for the next episode, only to find it's really nothing. They admit to doing it like it's supposed to be cunning. That really pissed me off because they essentially didn't answer any questions. Pure fuckery.

Should definitely watch it, I watched both seasons in like 3 days and it was fucking amazing. I recommend watching season 1 and 2 before 3 (starting tomorrow) however.

Duende - November 16, 2017, 8:12 am

Personally, i believe its worth watching it. What's your taste in series though?

Decim - November 17, 2017, 8:04 am

Season 1 was top-notch. Couldn't get past half of season 2.

(Sep 29, 2017 06:45 PM)MrRandom Wrote: [\[CITE\]](#) The very meaning of a skid is a script kiddy, one that uses other people's scripts.

That's stupid. You don't have to reinvent the wheel everytime when perfectly good and established tools are already available.

Writing your own tools is time consuming, and for pentests where time is of importance, it can be downright detrimental.

All this is applicable as long as you know exactly what you're doing.

Good show with accurate details on hacking but it's very boring and confusing

labgames - November 18, 2017, 12:00 pm

I liked it a lot to be honest.
