Thread: [2nd Attempt at a Thread Design](#)

Effexion - September 30, 2017, 9:42 am

I think I may need to tone down the outer glow for a start. The way I did it will make it awkward though. I made the bits separately and then opened them and moved them across to the thread (I can't find 'place' in CC 2017). So would have to start again. I also feel the features bit is a little squashed. I might remake that with more room for text.

Wouldn't blue look much better Effexion? Good luck with the shop mate

Yandere - September 30, 2017, 9:45 am

I like it, the only thing I'm not a fan of is the purple you used. Maybe make it a bit brighter?

I think it might, you know. I will try it in blue ?. Long time no see, buddy. Hope you're keeping well.

Yeah, I really need to revise that colour. Thanks, man ?.

Boxes are too far apart, and slanted overlapping figures overlapping the glow makes no sense. Think you can definitely do better mate, text is great.

entiretv - September 30, 2017, 10:08 am

The text is ok but some pictures and text are stretched. Number one rule with fonts and pictures is NEVER STRETCH them proportionately

Captain Steve Rogers - September 30, 2017, 10:12 am

I didn't like text font/size in Features part.

James Burnham - September 30, 2017, 10:13 am

Don't distort text. It's unreadable. Keep it at its original height and width.

What this user said, and use shift while resizing images.

oRequiem - September 30, 2017, 10:59 am

It's defiantly unique, I'll say that.

The "Features" box has really skinny text that kinda throws it out and the color doesn't seem to fit. Other than that, looks great OP.

Think you can definitely do better mate, text is great. I just didn't want plain, old boxes there and wanted something to break it up a bit. Thanks for the vote of confidence, though. I am pretty confident I can tweak this into something a lot better. Will do this tomorrow.

Deffo for next attempt ?.

How so? I don't know what shift does ?.

Yeah will be fixing that tomorrow and attempting new colours. Thanks a ton, man.

The text in some of them looks very crunched and distorted

are u saving as png and not jpeg? Also experiment with different fonts

RUMRUN - October 2, 2017, 9:37 am

If you resize text with CTRL + T, hold SHIFT to keep it from looking like a pile of trash.
Other than the text, it looks great.

FamousHater - October 2, 2017, 9:41 am

too plain

i just see purple everywhere so guessing thats your fav color too.

you should look at user Artist or maxim's tuts on thread design as u need them

Yeah I noticed the same thing straight away. Also not a huge fan of the layout, it's messy and looks like it's not all in one.

Excalibur' - October 3, 2017, 6:57 am

Pretty nice but you could do better! Here are some things to look at:

1. The color
2. The Font
3. The Font being too stretched
4. The images being pretty far apart

Other than that I'd say its pretty good!

Nadisty - October 3, 2017, 6:59 am

Very nice OP, but as others have pointed out the text looks stretched.

Eaesi - October 3, 2017, 6:52 pm

It's pretty garbage to be honest - don't listen to other people tell you it's good when it isn't. Hit me up for some tips if interested in progressing.
