Thread: [Xender's Free Doxing Service \[6 Years of Experience\]](#)

Xender - October 1, 2017, 9:24 am

I just came back to Hack Forums forums after taking a short break, I'm planning on launching a paid doxing service in the marketplace next week. I think it'll be pretty successful considering I've been studying private investigation methods since 2011.

I am currently offering a free doxing service for all l33t and ub3r members on the forum so that I can have a good amount of legitimate vouches for when I launch the service. If you're interested just create a post on the thread and I'll private message you or if you wish to keep the request private you can just private message me directly.

Howdy!

I am in need of a dox on a phone number that recently messaged a friend of mine saying he was all over another girl at a party the other night.

Would love to try your service!

I'm interested i think someone catfished me LOL and is lying about her information can you help me with this?

Xender - October 5, 2017, 1:31 pm

I have received over 20 requests since I've opened this service, if you haven't gotten a response yet it's because I'm busy fulfilling other orders. I will get to all of you within the next few days.

I would Like to Get your service.

Xender - *October 7, 2017, 1:26 pm*

I've completed quite a few requests and just sent out private messages containing the information. If you sent a request and didn't receive a pm then I've either overlooked your request on accident or you sent in too vague of information. Easily received 30+ requests since I've opened the service.

I will be closing this service as I believe I have enough vouchers for my upcoming service.
