Lmfao.

I'm not buying your scam ICO, OP.

15.4k twitter followers, and not a single one by someone I follow and I follow hundreds of crypto heads.

Not only that, 15.4k twitter followers and only 21 members in your telegram? Lol. Plus, no detail whatsoever on how anything is being performed. Just "we're gonna revolutionize it".

?

I'm not the creator my dude I'm just letting people know if they want to get coins for 1/4th of the price that they will hit exchanges. Half of coins are a scam man. For god only knows they bought a fake twitter follower account on HF and started from there.

The technology is awesome, but how do you advertise it to gain more buyers... use yt and fb...

What affiliation do you have with the creator then? Obviously a lot, considering they gave you, assuming you as you've used personal pronouns in your post, 100,000 tokens to distribute...

"On that date I will no longer be selling coins for \$0.25 as they will be \$0.50"

For now I'd advice to not purchase anything from this user.

'ICO launch on exchanges: Early 2018

ICO launch price: \$1/coin'

Why would an ICO be on an exchange? I don't understand this part and how can you choose the price of exchanges, doesn't seem thought through to be honest.
