Thread: [SMS / Email Bomber | ANTI-STACK | CUSTOM THEME | FULL SOURCE Giveaway Coded in VB.NET](#)

TOM - October 4, 2017, 8:45 am

Description: MailDestroyer is a newly made email bomber Made with intention selling in the marketplace because it has huge potential.

It is unreleased Tool that I bought From auction but I decided to give this away free to all Ub3r and L33t members It has a custom anti-stack so all messages won't just stack into one, and it has a custom "theme"

What Will you be Getting?

FULL SOURCE VB.NET

Terms :

You are not allowed to Resell / Rebrand This Source and sell on the Marketplace without my permission

That means You are Not allowed To use this Source to Modify add more features and sell in the marketplace without my permission - P.m and get permission to sell

Additional Feature

There isn't really a screenshot for the Sms Function but its the exact same as email bombing but instead of myemail@mail.ru its

phonenumber@carrier.domain

MAIL DESTROYER Screenshots

Lewwis - October 4, 2017, 8:47 am

I can confirm he did buy from me and it is his choice what happens with the source not mine.

Can I get this source please ? Thx in advance buddy

TOM - October 31, 2017, 9:02 am

(Feb 22, 2017 03:56 PM)Buildoman Wrote: [\[CITE\]](#) SILENTBYTES REVIEW

GUI 8.5/10

The GUI is very clean and has a simple layout. Everything is exactly where you would expect it to be and it makes using the program much easier.

I wish some of the features were labled a bit better but it has not impeded my usage at all.

Overview - 9/10

Over my time of using RAT's I have not used many Java based ones and the ones I did use were not very stable. SilentBytes however defies

this norm as I have found it to be quite stable and running very smoothly. I have had no problems with clients disconnecting or not connecting at all

and it runs perfectly on every operating system I have tested it on.

Features - 10/10

SilentBytes also has more features than you would expect from a Java RAT and they all work quite well. It has one of the smoothest remote desktops

I have ever seen on a RAT and none of the features impact its great stability.

Overall - 9/10

Overall this RAT (from my experience using it) is extremely well coded and runs great. This is one of the first Java RAT's I can confidently reccomend for usage.
